(N)

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates pursuant to the decision in United States Telephone Association v. FCC (Case No. 97-1469)(slip. op. May 21, 1999)(D.C. Cir.), or pursuant to pending motions, or petitions for reconsideration or waiver (and including, but not limited to, any Application for Review of the letter from Lawrence E. Strickling, Chief, Common Carrier Bureau, FCC, to Dale Robertson, SBC, dated May 18, 1999 which may be filed with the Commission), or in the event of any other adjustment pursuant to an order of the Commission or a court.

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates pursuant to the decision in United States Telephone Association v. FCC (Case No. 97-1469)(slip. op. May 21, 1999)(D.C. Cir.), or pursuant to pending motions, or petitions for reconsideration or waiver (and including, but not limited to, any Application for Review of the letter from Lawrence E. Strickling, Chief, Common Carrier Bureau, FCC, to Dale Robertson, SBC, dated May 18, 1999 which may be filed with the Commission), or in the event of any other adjustment pursuant to an order of the Commission or a court.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.3 Service Descriptions, Rates and Charges (Cont'd)7.3.11 DovLinksm Service(A) Basic Channel Description

A DovLinksm channel is a channel for the transmission of either synchronous or asynchronous data at speeds of 2.4, 4.8, 9.6 or 19.2 kbps. The actual bit rate is a function (N) of the channel interface selected by the customer. A DovLinksm Channel Termination is provided as a derived channel of a customer's intraexchange voice grade service loop facility. The customer may transmit data over the DovLinksm channel simultaneously with a voice transmission. The customer must provide a data voice multiplexer at the designated premises.

DovLinksm is provided where suitable intraexchange voice grade service loop facilities are available subject to the transmission limitations of the facilities and equipment used by the Telephone Company. DovLinksm is provided between customer designated premises or between a customer designated premises and a Telephone Company Hub where bridging or multiplexing functions are performed.

(B) Technical Specifications

The technical specifications for the customer-provided data voice multiplexer are delineated in the appropriate Technical Reference for DovLinksm Service.

(This page filed under Transmittal No. 2341)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.3 Service Descriptions, Rates and Charges (Cont'd)7.3.11 DovLinksm Service (Cont'd)(C) Channel Interfaces

The following channel interfaces (CI) define the bit rates that are available for a DovLinksm channel:

<u>CI</u>	<u>Bit Rate</u>
02DV5BA	2.4 kbps
02DV5BB	4.8 kbps
02DV5BC	9.6 kbps
02DV5BL	19.2 kbps

(N)

(D) Optional Features, BSEs and Functions

Only those MegaLink Data Service Optional Features, BSEs and Functions listed below are available with DovLinksm Service.

(1) Central Office Bridging BSE Capability

Central office bridging connects three or more customer designated premises in a multipoint arrangement.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.3 Service Descriptions (Cont'd)7.3.12 Gigabit Ethernet Metropolitan Area Network (GigaMAN) (x)(A) Basic Channel Description

GigaMAN is a fiber based, point-to-point, gigabit Ethernet service that allows customers to transport data signals between local area networks (LANs). GigaMAN transports data signals at the rate of 1 gigabit per second (Gbps). All basic service configurations provide a single direction of transmission. There is one basic type of GigaMAN service configuration: Node-to-Node service (two-point service), which connects two customer-designated premises, either inter or intra wire center. (x)

The following regulations will apply to GigaMAN: (x)

- (1) This service is available to customers in those LATAs served by and within the service territories of Southwestern Bell Telephone (SWBT) only. (x)
- (2) If existing facilities do not exist Special Construction may apply. (x)
- (3) This service is limited to a distance of approximately 50 route kilometers or less (approx. 31 miles), or maximum fiber optic loss between nodes of 29 db. (x)
- (4) SWBT considers a service interrupted when it becomes unusable to the customer because of a failure of a facility component used to furnish service under this tariff in the event that the protective controls applied by SWBT result in the complete loss of service by the customer. An interruption period starts when a customer reports an inoperative service to SWBT and SWBT confirms that continuity has been lost, and ends when the service is operative. (x)

(x) Issued under authority of Special Permission No. 03-093 of the FCC in order to restore currently effective material and to withdraw material without becoming effective, filed under Transmittal No. 2967.

(This page filed under Transmittal No. 2969)

Issued: October 22, 2003

Effective: October 23, 2003

One SBC Plaza, Dallas, Texas 75202

ACCESS SERVICE

7. Special Access Service (Cont'd)7.3 Service Descriptions (Cont'd)7.3.12 Gigabit Ethernet Metropolitan Area Network (GigaMAN) (x)
(Cont'd)(A) Basic Channel Description (Cont'd)

(5) Service Provisioning (x)

(a) The customer provided equipment (CPE) must deliver the data signals for GigaMAN transport for the subscribed data service. (x)

(b) GigaMAN provides physical layer transport only. SWBT assumes no responsibility for the through transmission of signals generated by the CPE, for the signals by the CPE, or address signaling to the extent the CPE performs addressing. Error detection and correction of data generated by the CPE is the customer's responsibility. (x)

(B) Channel Configuration

There are 3 basic rate elements, which apply to GigaMAN service: (x)

(1) Local Distribution Channel (LDC)

Local Distribution Channel (Same as Channel Termination) is the termination of GigaMAN at a customer designated premise (node), as described in Section 7.2.1(A). A minimum of two LDCs apply, each consisting of the following two elements: (x)

(a) the termination for the fiber optic facilities at each node and its serving wire center. (x)

(b) the fiber optic facility between each node and its serving wire center. (x)

(2) Interoffice Mileage

Interoffice Transport facilities, which provide the transmission path between Serving Wire Centers associated with two customer designated premises, are comprised of Fixed and Per Mile rate elements.

(x) Issued under authority of Special Permission No. 03-093 of the FCC in order to restore currently effective material and to withdraw material without becoming effective, filed under Transmittal No. 2967.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.3 Service Descriptions (Cont'd)7.3.12 Gigabit Ethernet Metropolitan Area Network (GigaMAN)
(Cont'd)(C) Non-recurring Charges

Non-recurring charges are one-time charges that apply for specific work activity related to the provisioning of GigaMAN Service, as described in Section 7.2.4.

(D) Recurring Charges

Recurring Charges are rates that apply each month or fraction thereof that the service is provided. Recurring rates apply to 12-, 36-, or 60- month period under the terms and conditions of Term Pricing Plan (TPP), discussed in (F) following.

(E) Monthly Extension Rates

Upon completion of a TPP, customer's service will automatically convert to the Monthly Extension Rates unless the customer requests a new TPP.

(F) Term Pricing Plan (TPP)

GigaMAN is available for 12-, 36-, or 60- month periods. Monthly recurring charges apply for Local Distribution Channels (TMECS), Interoffice Transport Fixed Mileage (1L5XX), and Mileage (1L5XX) where appropriate.

(1) Renewals

At the end of a TPP period, the customer must select one of the following options within one month prior to the expiration date:

- a. Renew the service for a one, three, or five year TPP as provided in this tariff;
- b. Elect to disconnect the service upon expiration of the billing period; or
- c. Continue the service on a monthly basis at the current Monthly Extension Rates.

All services under an existing TPP that are not renewed within the period stated above will revert to Option (1) c above and be billed at the current Monthly Extension Rates.

(N)

(N)

(This page filed under Transmittal No. 2898)

Issued: May 13, 2002

Effective: May 14, 2002

ACCESS SERVICE

7. Special Access Service (Cont'd)7.3 Service Descriptions (Cont'd)7.3.12 Gigabit Ethernet Metropolitan Area Network (GigaMAN)
(Cont'd)(F) Term Pricing Plan (TPP) (cont'd)

(2) Conversions

During the customer's TPP term conversions may be made to a new TPP term of the same or greater length. The expiration date of the new service must be beyond the expiration date of the original TPP term. With the new TPP, the customer incurs no liability for the remaining months on the original TPP.

An Administrative Charge is applicable when customers renew or change the length of the TPP term.

(3) Termination Liability

Customers requesting termination of service prior to expiration date of the TPP term will be liable for a termination charge, which is calculated as follows:

Billing Period	Termination Percentage
1 Year	85%
3 Year	75%
5 Year	60%

(Monthly Recurring Rate)*(Months Remaining in Billing)*(Termination Percentage) = Term. Liability Charge

Example: A GigaMAN Customer with a \$6,000.00 monthly rate terminates service after 2 years with 1 year (12 months) remaining in a 3 year TPP. The termination liability would be calculated as follows:

$\$6,000 \times 12 \times .75 = \$54,000.00$ Termination Charge

(This page filed under Transmittal No. 2898)

7. Special Access Service (Cont'd)7.3 Service Descriptions (Cont'd)7.3.12 Gigabit Ethernet Metropolitan Area Network (GigaMAN)
(Cont'd)(G) Moves

Moves involve a change in the physical location of one of the following:

- Service rearrangement;
- Point of Termination at the customer's premises;
- or
- Customer's premises.

Move charges are dependent upon the type of move requested by the customer.

(1) Service Rearrangement

Service rearrangements are changes to existing (installed) services, which do not result in a change in the minimum period requirements, as set forth in Section 7.2.4 (D).

(2) Moves Within the Same Building

When the move is to a new location within the same building, the Administration charge and Customer Connection charge for the service termination affected will apply. There will be no change in the minimum period requirements, as described in Section 7.2.7 (B).

(3) Moves to a Different Building

Moves to a different building will be treated as a discontinuance therefore start of service, all associated nonrecurring charges, and new minimum period requirements, as described in Section 7.2.7 (C), will apply.

(H) Mileage Measurement

The mileage is calculated on the airline distance between the locations involved, i.e. the serving wire centers associated with two customer designated premises and an international boundary point, a serving wire center associated with a customer designated premise and a Telephone Company Hub, a serving wire center associated with a customer designated premise and a WATS Serving Office as described in Section 7.2.6.

7.3.12 Gigabit Ethernet Metropolitan Area Network (GigaMAN)
(Cont'd)

(I) Upgrade to GigaMAN from other Access Products

(N)

Other Access products may not upgrade to GigaMAN without incurring applicable Termination Liability charges, if any, on that current access product.

(J) Modification of Access Service

The customer may request a modification of its Access Order at anytime prior to notification by SWBT that service is available for the customer's use. SWBT will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours.

If the modification cannot be made with the work force during normal business hours, SWBT will notify the customer. If the customer still desires the Access Order Modification, SWBT will schedule a new service date. All charges for Access Order modifications will apply on a per occurrence basis as described in Section 5.3.2.

ACCESS SERVICE

8. Term Pricing Plan Vintage Rates

8.1 Rates and Charges

8.1.1 General Regulations

Term Pricing Plan vintage rates are those rates that apply to existing services provided under a term pricing plan in the event the Telephone Company initiates a rate increase. Vintage rates as set forth following are classified as vintage because the Telephone Company ensures that rates provided under a term pricing plan will not be increased by the Telephone Company, above the term pricing plan rate in effect at the beginning of the customer's term pricing plan.

Customers under their current term pricing plans will continue to pay the rates as shown in the original sections until such time as:

- the effective tariff rate in the original section becomes lower than the vintage rate, or
- the customer's existing term pricing plan expires, or
- the service is terminated by the customer.

In addition, other customer modifications, other than termination, that cause a new rate or term pricing plan to be established will result in the service becoming non-vintage and the rates as specified in the original sections will apply.

8.1.2 Vintage Rates

(A) The following rates apply to services installed prior to July 2, 2002, unless rates as specified under 7.3.10(F), 20.5.2, 20.5.4, 20.5.7 and 31.3.3(D) are lower, in which case the referenced rates apply.

1. High Capacity Term Pricing Plan (HC-TPP):

<u>Collocation Transport</u>	<u>USOC</u>	<u>3 Year Per Mile</u>
1.544 Mbps	(1H48S)	\$12.60

2. MegaLink Custom Services:

a. Optical Channel Termination - AR - Zone 1

<u>Volume Option*</u>	<u>USOC</u>	<u>3 year</u>
1	TUZPX	\$ 1,200.00
3	TUZPX	\$ 3,300.00
6	TUZPX	\$ 5,800.00
12	TUZPX	\$10,200.00

*Volume Option specifies the number of DS3s or DS3 equivalents.
 Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively, in the event the Commission or a court subsequently authorizes Southwestern Bell Telephone Company to correct its rates pursuant to pending motions, or petitions for reconsideration or waiver, or in the event of any other adjustment to an order of the Commission or a court.

ACCESS SERVICE

9. Directory Assistance Access Service

9.1 General

Directory Assistance (DA) Access Service provides access to Telephone Company Directory Assistance Service locations (DA locations), use of DA access equipment and use of DA operators. DA Access Service provides for the ability to terminate calls from a customer's premises to a Telephone Company DA location to obtain telephone listing information.

Issued:
June
16,
1998

The following diagrams depict a generic view of the components of DA Access Service and the manner in which the components are combined to provide a complete Access Service.

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

ACCESS SERVICE

9. Directory Assistance Access Service9.2 Service Description

- (A) Upon being furnished a name and locality by the customer's end user, the Telephone Company DA operator will provide or attempt to provide the telephone number listed in the Telephone Company DA records associated with the name given. The Telephone Company's contact with the customer's end user is limited to that effort necessary to provide a customer's end user's request for a telephone number; and the Telephone Company will not transfer, forward or redial a customer's end user's call to any other location for any purpose other than the provision of DA Service.
- (B) DA operators will respond to a maximum of two (2) telephone number requests per call to the DA operator. A telephone number which is not listed in DA records will not be available to the customer's end user. When the DA location or DA operator equipment or terminals are out of service due to a Telephone Company equipment failure, or an incorrect number is provided, a credit will apply as specified in 9.4.5 (Credit Allowance for DA Service). Telephone Company DA Access Service is not available for 800-555-1212 traffic. (T)
- (C) The Telephone Company will distribute the calls received over the DA Access Service to the DA operators using the DA location access equipment. The Telephone Company will specify the DA location which provides the DA Service for each Numbering Plan Area code (NPA). The DA locations are specified in the National Exchange Carrier Association, Inc., Tariff F.C.C. No. 4 (NECA No. 4), Wire Center and Interconnection Information. When the Telephone Company determines it necessary to change a DA location, the involved customer will be notified by the Telephone Company six months prior to the change. For such changes, the regulations specified in 2.1.4(F) and (G) will apply.

1010 Pine Street, St. Louis, Missouri 63101

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning9.3.1 Manner of Provisioning

- (A) DA Access Service is a terminating service only. Terminating traffic represents access capacity for all LATAs within the NPA for carrying traffic from the customer to the DA location.
- (B) Transport of Directory Assistance Access Service is provided between the customer's premises and a particular DA location using the Switched Transport facilities set forth in Section 6.5 (Switched Transport). These facilities include:
- Entrance Facility for the transport of the DA Access Service call from the customer's premises to the Telephone Company's serving wire center
 - Direct-Trunked Transport facility for transport of the DA Access Service Call from the Telephone Company's serving wire center to the DA location without routing through an access tandem.
 - Tandem-Switched Transport facility for transport of the DA Access Service Call from the Access Tandem to the DA location. Tandem-Switched Transport includes the switching functions performed by the access tandem. (C)

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

(T)

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)

9.3 Service Provisioning (Cont'd)

9.3.1 Manner of Provisioning (Cont'd)

(C) At the customer's option and where technically feasible, DA Access Service may either be provided over trunk groups dedicated to DA Access Service or it may be combined with the customer's FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service as set forth in (1) and (2) following. (T)

(1) Dedicated Trunk Groups (T)

When the customer requests trunk groups dedicated to DA Access Service, a Direct-Trunked Transport facility is required to transport the DA Access Service Call from the Telephone Company's serving wire center to the DA location. An Entrance Facility for the dedicated trunk groups is also required for transport of the DA Access Service Call from the customer premises to the serving wire center. When dedicated trunk groups are requested, address signaling is not provided on either the Entrance Facility or the Direct-Trunked Transport. (C)

When dedicated trunk groups are requested, the Telephone Company may require the customer to order a separate trunk group for each NPA. Separate trunk groups will be required when the Telephone Company notifies the customer that the mechanized search of its data base and its mechanized operator practices require a mechanized identification of the NPA code for which the customer's end user desires DA information. (M)

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.1 Manner of Provisioning (Cont'd)

(C) (Cont'd)

(2) Combined Trunk Groups

(T)

When the customer requests to have DA Access Service combined with FGB, FGC, FGD, BSA-B, BSA-C or BSA-D traffic, a Tandem-Switched Transport facility is required (i.e., DA Access Service can only be combined with tandem routed trunk side Switched Access Services). An Entrance Facility for the trunk groups combining the trunk side Switched Access Service and the DA Access Service is also required for transport of the DA Access Service Call from the customer premises to the serving wire center. When DA Access Service is combined with tandem routed trunk side Switched Access Services, wink start-start pulsing signaling is provided at the access tandem switch. (C)

DA Access Service using combined trunk groups allows for transport of the DA Access Service call (1-411, 555-1212 or NPA-555-1212) from the customer's premises to the access tandem to the DA location. However, only NPA codes handled by the DA location served by the access tandem switch will be processed. (T)
(M)

(D) Trunk side switching is provided at the DA location. (T)

(E) DA Access Service is ordered under the provisions specified in Section 5 (Ordering for Access Service). Also included in that section are charges associated with ordering DA Access Service. (T)
(M)
(T)
(T)

9.3.3 Interface Groups

(A) Switched Transport Interface Groups 2 through 9, as specified in 6.7.6 (Interface Groups), are provided for terminating the Directory Transport at the customer's premises. In addition, for each Interface Group, premises interface codes are available as a function of the Telephone Company switch supervisory signaling and Switched Access feature group. These premises interface codes are also specified in 6.7.6. (T)

- When DA Service is provided over FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service, the premises interface code for the combination will be the available premises interface code provided for the FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service ordered by the customer.

- When DA Service is provided over access service trunk groups dedicated for DA traffic, the following premises interface codes are available:

4DS9-15	6EA2-E	4RV2-0
4DS9-31	6EA2-M	4AH5-B
4DS0-63	4SF3	4AH6-C
4DS6-44		4AH6-D
4DS6-27		

(B) Except as specified in 9.4.4 (DA Minimum Period), the interface groups and premises interface codes provided for DA Access Service utilizing Direct-Trunked Transport facilities are subject to the ordering conditions specified in Section 5 (Ordering for Access Service). For purposes of applying the ordering regulations, a DA location is considered to be a customer's end user's serving wire center. (T)

9.3 Service Provisioning (Cont'd)

9.3.6 Testing

(A) Acceptance Testing

At no additional charge, the Telephone Company will, at the customer's request, cooperatively test, at the time of installation, the following parameters:

- loss,
- C-notched noise,
- C-message noise,
- 3-tone slope,
- d.c. continuity, and
- operational signaling.

When the Directory Transport is provided with interface groups 2 through 9, and the transport termination is two-wire (i.e., there is a four-wire to two-wire conversion in Directory Transport), balance parameters (equal level echo path loss) may also be tested. (T)

For DA Transport using a DS1 or a DS3 connection as specified in 6.5 (Switched Transport), acceptance tests will include tests applicable to the connection as specified in Technical Reference TP 76625. (N)

9.3.6 Testing (Cont'd)

(B) Testing Capabilities

In addition, to the acceptance tests described above, which are included with the installation of service, Additional Cooperative Scheduled Testing and Manual Scheduled Testing are available as described in 13.3.6 (Testing Services for Switched Access Service). For DA Transport facilities, as set forth in 9.3.1 (Manner of Provisioning), Additional Cooperative Testing and Nonscheduled Testing are available as described in 13.3.7 (Testing Services for Special Access Service, MegaLink Custom Service and Self-healing Transport Network (STN)).

The following testing capabilities are available on an ongoing basis when DA Access Service is combined with FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service and routed through an access tandem to the DA location:

In the terminating direction, where equipment is available, FGB, FGC, FGD, BSA-B, BSA-C and BSA-D are provided with:

- seven digit access to balance (100 type) test line,
- milliwat (102 type) test line,
- nonsynchronous or synchronous test line,
- automatic transmission measuring (105 type) test line,
- data transmission (107 type) test line,
- loop around test line,
- short circuit test line, and
- open circuit test line.

9.4 Rate Regulations

This section contains the specific regulations governing the rates and charges which apply for DA Access Service. There are three types of rates and charges that apply to the various rate categories of DA Access Service. These are nonrecurring charges, monthly recurring rates (including fixed and per mile rates) and usage rates.

(C)
|
|
(C)

Specific rates and charges are set forth in 9.5 (Rates and Charges). Jurisdictional Reporting Requirements for DA Access Service are as set forth in 2.4 (Jurisdictional Reports). Ordering, rating and billing procedures as specified in 2.6 (Jointly Provided Access Service) will apply for access services where more than one Exchange Telephone Company is involved.

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)

9.4 Rate Regulations (Cont'd)

9.4.2 Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation or change to an existing service.) Nonrecurring charges are applicable for installation of services, installation of DA Transport facilities, installation of features, and for certain service rearrangements. In addition, an Access Order Charge may be applicable as specified in 5.3.1 (Access Order Charges). (C) (C)

The nonrecurring charges which apply for DA Access Service are the applicable nonrecurring charges for Switched Transport facilities and FGB, FGC, FGD, BSA-B, BSA-C and BSA-D Switched Access Service as described in 6.8.2 (Nonrecurring Charges). (C) (T)

9.4 Rate Regulations (Cont'd)

9.4.3 Monthly Recurring and Usage Rates

(A) General

Monthly recurring rates (including fixed and per mile rates) are flat recurring rates that apply each month or fraction thereof that a specific rate category is provided. For billing purposes, each month is considered to have thirty (30) days. Usage rates are rates that apply on a per unit basis (e.g., per call or per call per mile) when a specific rate element is used. Usage charges are accumulated over a monthly period.

(B) DA Service Call

(T)

The DA Service Call is a usage rate which applies for each call that has been answered by or forwarded to a DA operator. The number of calls answered by or forwarded to DA operators will be accumulated by Telephone Company measuring equipment. The charge applies whether or not the DA operator provides the requested telephone number.

(This page filed under Transmittal No. 2788)

Issued: October 26, 1999

Effective: November 2, 1999

One Bell Plaza, Dallas, Texas 75202

(T)

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport

(T)

The Directory Transport rate element is composed of the following:

- Entrance Facility
- Direct-Trunked Transport
- Tandem-Switched Transport (which is composed of a Tandem-Switched Directory Transmission rate and a Directory Tandem Switching rate).

Rates for Directory Transport are specific to the subcategory being provided and are described below:

(1) Entrance Facility

A monthly rate applies to each Entrance Facility provided for DA Access Service on either a per point of termination basis (for Voice Grade) or on a per type of connection basis (for DS1 and DS3). The monthly rate is set forth in 6.9.2 (Rates and Charges).

When the Entrance Facility is dedicated to DA Access Service, the monthly rate for the Entrance Facility applies. When DA Access Service is provided over a Switched Transport Entrance Facility that combines both DA Access Service and Switched Access Service, only one Switched Transport Entrance Facility charge applies.

(This page filed under Transmittal No. 2788)

Effective: November 2, 1999

One Bell Plaza, Dallas, Texas 75202

(T)

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport (Cont'd)

(T)

(2) Direct-Trunked Transport

For each Direct-Trunked Transport facility provided for DA Access Service, the following monthly rates apply:

- a fixed monthly rate
- a monthly rate per mile

on a per connection type basis (i.e., Voice Grade, DS1 or DS3). The monthly rates are set forth in 6.9.2 (Rates and Charges). Mileage measurement is set forth in (4) following.

The monthly rates for Direct-Trunked Transport apply only when the Direct-Trunked Transport facility is dedicated to DA Access Service. When DA Access Service is provided over a Switched Transport Direct-Trunked Transport facility that combines both DA Access Service and Switched Access Service (i.e., some of the channels in the facility transport only DA Access Service and other channels in the facility transport only Switched Access services), only one Direct-Trunked Transport rate applies.

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the x-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport (Cont'd)

(T)

(3) Tandem-Switched Transport

Tandem-Switched Transport is provided as four sub-elements:

- Tandem-Switched Directory Transmission
- Directory Tandem Switching
- Dedicated Tandem Trunk Port
- Tandem DA Location Multiplexing

The application of the Tandem-Switched Transport sub-elements is set forth in (a) and (b) following.

(a) Tandem-Switched Directory Transmission

A per call rate and a per call per mile rate applies to each DA call which has been answered by or forwarded to a DA operator when the transport was provided using a Tandem-Switched Transport facility. Mileage measurement is described in (4) following.

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

(T)

(3) Tandem-Switched Transport (Cont'd)(b) Directory Tandem Switching

A rate per call applies to each DA call which has been answered by or forwarded to a DA operator when the transport was provided using a Tandem-Switched Transport facility.

- Tandem Switched Directory Transport

Tandem-Switched Directory Transmission rates apply to the mileage measured from the access tandem to the DA location. Directory Tandem Switching is also applied for the switching functions of the access tandem.

- Direct-Trunked Transport

Direct-Trunked Transport rates apply to mileage measured from the serving wire center to the access tandem. The customer can also specify routing to hubbing locations between the serving wire center and the access tandem. If intermediate hubbing is requested, mileage between hubs is also measured as set forth in 6.8.5 (Determining Switched Transport Mileage and Charges). Tandem-Switched Directory Transmission rates are applied to the mileage measured from the access tandem to the DA location. Directory Tandem Switching is also applied for the switching functions of the access tandem.

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

A per call charge applies for the use of the multiplexing equipment on the DA location side of the access tandem.

(d) Dedicated Tandem Trunk Port (T)

A monthly rate applies, per port, for each dedicated trunk on the serving wire center side of the access tandem.

(4) Mileage

The mileage for Directory Transport is measured from the serving wire center for the premises of the ordering customer to the DA location. These two wire centers may be in different LATAs. In addition, the premises of the ordering customer must be in the LATA where DA Service is requested or in the LATA of the DA location. The measurement will be performed and charges determined as described in 6.8.5 (Determining Switched Transport Mileage and Charges).

9.4.4 DA Minimum Period

DA Access Service is provided for a minimum period of six months. A minimum period of six months applies for each additional period of service ordered or extended.

If DA Access Service is discontinued prior to the end of each six month period, the charges that apply for the remaining months are the non-recoverable costs less estimated net salvage. Non-recoverable costs include the non-recoverable cost of equipment and material ordered, provided or used, plus the non-recoverable cost of installation and removal including the costs of engineering, labor, supervision, transportation, rights-of-way and other associated costs.

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.5 Credit Allowance for DA Service

(T)

(A) Per call credits will be allowed for DA Service Call, DA Interconnection Charge and Tandem-Switched Transport in the following situations. The customer shall report such calls and include the following information.

(1) Telephone Company Equipment Failure

When a DA call is not completed because the DA location or DA operator equipment or terminals are out of service due to a Telephone Company equipment failure, a credit allowance is applicable.

The customer shall report such calls and include the DA number dialed, the time of the call and the date of the call. The number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the customer.

(2) Incorrect Number

When a DA operator or DA equipment provides an incorrect number for a call, a credit allowance is applicable.

The customer shall report such calls and include the number requested, the number provided and the reason the number provided is incorrect. The number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the customer.

Material is filed under authority of Special Permission No. 97-234 of the F.C.C. and withdraws material issued under Transmittal No. 2650 to become effective August 6, 1997.

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.5 Credit Allowance for DA Service (Cont'd)

(A) (Cont'd)

(3) Application of Credit Allowance

- The amount of credit to be applied per call is the sum of all DA Service per call rates (i.e., DA Service Call and Tandem-Switched Transport per call rates). These rates are set forth in 9.5 (Rates and Charges). (D)
 - The credit allowance for the Switched Access usage sensitive portion of the call in the originating LATA of the DA call is as specified in 9.5(Switched Access Service Credit Allowance for DA Calls). (T)
 - No credit is applicable when the telephone number is unavailable to the DA Operator.
- (B) Credit allowances for monthly recurring rates are only available for service interruptions and will be provided as set forth in 2.5.6 (Credit Allowance for Service Interruptions) and 2.5.7 (Service Assurance Warranty Schedule).

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.6 Moves

(T)

A move involves a change in the physical location of one of the following:

- The point of termination at the customer's premises.
- The customer's premises.

Moves will be treated and charged for as specified in 6.8.10 (Moves). When the move involves a change in the physical location of the customer's premises, minimum period requirements will be established at the new location as specified in 6.8.10 and the customer will remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

Material is filed under authority of Special Permission No. 97-234 of the F.C.C. and withdraws material issued under Transmittal No. 2650 to become effective August 6, 1997.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements10.1 General

This section covers Specialized Services or Arrangements that are provided to a customer for use only by agencies or branches of the Federal Government and other users authorized by the Federal Government, and includes the Telecommunications Service Priority (TSP) System procedures administered by the National Communications System (NCS) and the Federal Government Telecommunications Services (FGTS). (T)

Some of the services described in this section are provided for command and control communications, state emergency operations centers, communications for national security, emergency preparedness, and presidential requirements. They are required to assure continuity of Government in emergency and crisis situations and to provide for national security. (S)

Revised and reissued material is filed under authority of Special Permission No. 92-798 of the F.C.C. and is deferred until November 29, 1992.

(This page filed under Transmittal No. 2238)

Issued: October 29, 1992

Effective: October 30, 1992

1010 Pine Street, St. Louis, Missouri 63101

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd) (M)

10.2 Service Provisioning (T)

Services for command and control communications and for national security and emergency preparedness sometimes require short notice and short duration service provisions. These provisions are especially needed to meet presidential requirements or in response to natural, man-made, or declared emergencies. Requirements of this type cannot be forecasted and are usually needed for a relatively short period. (M)

(A) Provisioning Intervals (T)

(1) Emergency Conditions (T)

The services set forth in this section will be provided on the date requested or as soon as possible thereafter when the emergency falls into one of the following categories: (M)

(a) State of crisis declared by the National Command Authorities (includes commitments made to the National Communications System in the "National Plan for Emergencies and Major Disasters"). (M)

(b) Efforts to protect endangered U.S. personnel or property both in the U.S. and abroad (includes space vehicle recovery and protection efforts). (T)

(c) Communications requirements resulting from hostile action, a major disaster or a major civil disturbance. (M)

(d) The director (Cabinet level) of a Federal department, Commander of a Unified/Specified Command, or head of a military department has certified that a communications requirement is so critical to the protection of life and property or to the National Defense that it must be processed immediately. (M)

Material and revised material appearing on this page formerly appeared on 5th Revised Page 204 and 3rd Revised Page 204.1 of Tariff F.C.C. No. 68.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd) (M)

10.3 Service Descriptions (Cont'd) (T)

10.3.1 Voice Grade Special Access Service (T)

The provision of T-3 and G conditioned services contemplates station and tandem switching operations, using customer provided equipment, as well as Special Access Service. Separate metallic, telegraph or voice grade services, where required by the customer provided equipment or switching operation, are furnished in accordance with the applicable sections of this tariff. (M)

All Voice Grade Secure Communications provide an approximate bandwidth of 10-50,000 Hertz and can be used to transmit either voice frequency signaling or supervisory tones. (T)

(A) Voice Grade Secure Communications Type I

- Furnished on two-wire or four-wire metallic facilities for two-point secure communications between a customer premises location and an end user's premises. (T)
(M)

- The net loss of the conditioned service (with or without additional conditioning) shall not vary by more than four dB at 1,000 Hz from the levels specified following. (T)
(M)

T-3 Conditioning - The absolute loss (referenced to one milliwatt) with respect to frequency shall not exceed: (M)
(T)

- 15 dB at 10 Hz
- 13 dB at 100 Hz
- 9 dB at 1,000 Hz
- 20 dB at 10,000 Hz (M)
- 30 dB at 50,000 Hz. (T)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.4 Telecommunications Service Priority (TSP) System

The TSP System is a service, developed to meet the requirements of the Federal Government, which provides the regulatory, administrative, and operational framework for the priority installation and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services. The TSP System is available for both Switched and Special Access Services, but its applicability is limited to Access Services that the Telephone Company can discreetly identify for priority provisioning and restoring. The TSP System applies only to NSEP telecommunications services, and requires and authorizes priority action by the Telephone Company providing such services.

The customer for TSP System service also must be the same customer for the Access Service with which it is associated. The customer, in obtaining TSP System service, acknowledges and consents to the provision of certain customer service record information by the Telephone Company to the National Communications System (NCS) in order for the NCS to maintain and administer its overall TSP System. This customer service record information will include only TSP System Authorization Code and Telephone Company Circuit/Service ID.

Under certain conditions it may be necessary to preempt one or more customer services with a lower or no restoration priority in order to install or restore NSEP telecommunications service of a higher priority. If such preemption is necessary, and if circumstances permit, the Telephone Company will make reasonable effort to notify the preempted service customer of the action being taken. Credit allowance for such service preemption shall be made in accordance with the provisions in 2.5.6(E) concerning (T) Temporary Surrender of a Service.

10. Federal Government Specialized Services or Arrangements (Cont'd) (M)

10.3 Service Descriptions (Cont'd) (T)

10.3.4 Telecommunications Service Priority (TSP) System (Cont'd) (T)

TSP System service shall be provided in accordance with the guidelines set forth in the following: (T)

- National Communications System (NCS) Manual 3-1-1 (T)

"Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service User Manual" (M)

- National Communications System (NCS) Handbook 3-1-2 (T)

"Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service Vendor Handbook". (M)

In addition, priority installation and/or restoration of NSEP telecommunications services shall be provided in accordance with part 64.401, appendix A, of the Federal Communications Commission's (FCC's) Rules and Regulations. (M)

Material and revised material appearing on this page formerly appeared on 3rd Revised Page 204.5.1 and Original Page 204.5.2 of Tariff F.C.C. No. 68.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS)

(N)

The Government Emergency Telecommunications Service (GETS) provides authorized federal government end users with a national security and emergency preparedness (NS/EP) switched voice and data communications service utilizing the public switched network through a special code(s) in the Telephone Company's end offices. GETS is activated at the request of the Federal Government or its authorized agent. GETS facilities may not be used for non-emergency government telecommunications, non-GETS services or by unauthorized end users.

GETS operates in conjunction with Switched Access Services provided under other provisions of this tariff. GETS charges will have a PIU of 100%. The credit allowance for service interruption for GETS is the same as for the Access Service with which it is associated as set forth in 2.5.6 (Credit allowance for Service Interruptions) and 2.5.7 (Service Assurance Warranty Schedule).

(A) Alternate Carrier Routing (ACR) Feature

GETS Alternate Carrier Routing (ACR) is an advanced network feature and is available where facilities exist in suitably equipped end offices. The GETS ACR feature provides for the routing of the GETS universal access number to a sequence of GETS carriers. GETS ACR allows NS/EP end users to use the public switched network to provide enhanced call completion capability on calls made during times of national emergencies or disasters.

GETS ACR provides alternate route capability on calls originated from lines served by end offices equipped with the GETS ACR feature to the GETS universal access number. When the presubscribed carrier is a participating GETS carrier, GETS ACR enables calls first to be routed for completion to the presubscribed carrier of the originating line. When the presubscribed carrier is not a participating GETS carrier, then an office selection table (Ranking Table) determines the GETS carrier. The Ranking Table contains three alternatives for a GETS carrier and is preselected on a per end office basis using data provided by the Federal Government or its authorized agent.

(N)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)

10.3 Service Descriptions (Cont'd)

10.3.6 Government Emergency Telecommunications Service (GETS)
(Cont'd)

(B) Calling Party Number (CPN) Overlay Feature

Where technically feasible and facilities permit, the GETS Calling Party Number (CPN) Overlay feature is included with GETS ACR in suitably equipped GETS ACR end offices. The Federal Government or its authorized agent will determine the unique GETS CPN. The GETS CPN Overlay feature allows the network CPN information to be changed from the value of the actual calling party to a unique GETS number for all GETS ACR calls. The unique GETS CPN, not the actual calling party, is passed to the participating GETS carrier.

(C) Reports

There are two monthly reports available with GETS: Call Data Report and Service Control Point (SCP) Data Report.

(1) Call Data Report

The Call Data Report provides call detail associated with GETS ACR usage. The Call Data Report is populated using data from recordings of GETS calls.

(2) Service Control Point (SCP) Data Report

The SCP Data Report tabulates a count of the GETS carrier selection order list sent to the GETS ACR end offices for GETS calls that were processed. This report provides an aggregated total of each of the call categories by end office.

(N)

(D) High Probability of Connection (HPC) Feature

GETS HPC distinguishes the priority assigned to the call setup message in the Signaling System 7 (SS7) network. Setup messages associated with calls to 1-710-NCS-GETS would be sent with the highest priority. GETS HPC provides a trunk queuing feature in equipped switches which is invoked any time an Interexchange Carrier (IC) trunk group is busy. The queuing would only be applied to GETS calls and allows GETS users to dial an emergency call one time without having to redial. The call will automatically complete when the first available trunk becomes idle.

10.3.6 Government Emergency Telecommunications Service (GETS)
(Cont'd)

(D) High Probability of Connection (HPC) Feature (Cont'd)

(1) GETS HPC Service Features

(a) GETS Call Recognition

This feature provides the capability to recognize originating GETS calls from an administratable screen on the called number. The screen will be set on 710 on all switches and on four 800/888 numbers which provide access to GETS on specified switches only. A call recognized as a GETS call is said to be an HPC marked call.

(b) Trunk Group Queuing (TQ)

The feature provides the capability to queue HPC marked calls to specific trunk groups within the routing chain. Only HPC marked calls are allowed to queue.

(c) Exemption From Network Management Controls (EX-NMCs)

This feature provides HPC marked calls exemption from restrictive Network Management Controls.

(2) Reports

Operational Measurement (OM) Report

The Operational Measurement (OM) report provides periodic implementation status updates and ongoing service verification. The data format is in the form of a series of time stamped OM registers for each of the HPC equipped switches.

(E) GETS Egress Queuing (EQ)

GETS EQ is a switch-based feature that provides priority call processing to calls designated as HPC that are terminating on a designated PBX trunk group. GETS EQ extends the functionality of the existing GETS HPC feature to include two way and Primary Rate ISDN which connects a DMS to a PBX.

This feature is available on DMS100 switches with release NA012.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations

This section contains information related to the rate elements applicable to Federal Government Specialized Services or Arrangements.

Rates and charges associated with these rate elements are listed in 10.5. The rates and charges for certain of these services shall be developed on an ICB basis and shall be consistent with the rates and charges for services offered in other sections of this tariff.

Additional rates and charges may be applicable for other services which operate in conjunction with Special Routing Access Service, Telecommunications Service Priority (TSP) System and Government Emergency Telecommunications Service (GETS).

(T)
(N)
(N)

(A) Federal Government Regulations

In accordance with Federal Government Regulations, all service provided to the Federal Government will be billed in arrears. However, this provision does not apply to other customers that obtain services under the provisions of this tariff to provide their services to the Federal Government.

(B) Mileage Application

Mileage, when used for rate application between two serving wire centers or between an end office switch and the customer's serving wire center, shall be determined by the V and H Coordinates Method as set forth in National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4 and administered as set forth in 6.8.5 (Determining Switched Transport Mileage and Charges), 7.2.6 (Mileage Measurement) or 20.4.7 (Determining Interoffice Mileage).

(C) Moves

The provisions set forth in 6.8.10 (Moves), 7.2.7 (Moves) and 20.4.12 (Moves) apply to moves involving services provided in this Section.

 - (F) Telecommunications Service Priority (TSP) System (Cont'd)
 - (1) Rate Elements (Cont'd)
 - (b) Priority Restoration Level Implementation (Assignment): (T)

The act of designating the priority level for the restoration of a particular NSEP telecommunications service. (M)
 - (c) Priority Restoration Level Change: (T)

The act of changing the priority level assignment for a NSEP telecommunications service. This includes any extension of an existing priority level assignment to an expanded NSEP service. (M)
 - (d) Priority Restoration Administration and Maintenance: (T)

The act of administering and maintaining the TSP System in such a manner that it corresponds to the NCS data base. (M)
 - (2) Rate Application (T)

The Priority Installation (PI) charge and the Priority Restoration (either Level Implementation or Level Change) (PR) charge are applied per circuit for Special Access Service and per line or trunk for Switched Access Service. (M)

PI and PR apply only one time per circuit or line except when there is subsequent order activity to add legs or lines to the service. One PI or PR will apply each time leg(s) or line(s) are added to an existing TSP System. (M)

When an Access Service is ordered with both PI and PR, the nonrecurring charge for PR Implementation applies. (M)

(T)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements(Cont'd)10.4 Rate Regulations (Cont'd)(G) Federal Government Telecommunications Services (FGTS)(1) General

This section contains regulations, rates and charges applicable to the provision of FGTS to those Interexchange Carriers who have won the right to provide telecommunications service to the General Services Administration (GSA) and other Government agencies, including the agencies themselves as end users, for the sole use of the GSA and other such agencies. This section of the tariff does not apply to agencies that have not been awarded the special government contract.

Except as specifically noted below, all rules and regulations applicable to the rate elements provided under a monthly service arrangement (as set forth in Sections 7, 19, and 20 of this tariff) apply to those rate elements provided under FGTS. Rate elements not listed in 10.5.5 (Federal Government Telecommunications Service (FGTS)) are not available under FGTS and must be purchased as set forth in Sections 7, 19, and 20 of this tariff. Exceptions and/or additions to these rules and regulations as set forth in this section supersede those in other sections of this tariff.

If the Telephone Company initiates rate changes resulting in a decrease of rates for existing service with a 1 or 3 year service period, those rate changes will be passed along to the customer. Rate changes resulting in an increase of rates for an existing service with a 1 or 3 year service period will not exceed the original rate for that selected service period. Rate changes may occur as a result of F.C.C. action.

(2) Ordering

FGTS is provided as a monthly service arrangement with a 1 year or 3 year service period (Initial Service Period) for MegaLink Data Service or a 3 year service period (Initial Service Period) for Voice Grade 4 wire Service, High Capacity Service, MegaLink Custom Service, Self-Healing Transport Service and ReliaNetSM Service.

For services ordered under FGTS, only the Channel Termination nonrecurring charges will be waived. All other nonrecurring charges will apply including the Access Order Charge as set forth in Section 5.3.1 (Access Order Charges).

(C)

(C)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements(Cont'd)

10.4 Rate Regulations (Cont'd)

(G) Federal Government Telecommunications Services (FGTS)(Cont'd)

(2) Ordering (Cont'd)

(C)

When a rate element is ordered under FGTS, that rate element may not be used for non-FGTS services. No portion of a multiplexed rate element (High Capacity - DS1, MegaLink Custom - DS3, STN or ReliaNetSM) may be under FGTS unless the entire rate element is available under FGTS.

(C)

(3) Renewal of Service

The customer must provide the Telephone Company with a written notice of intent to renew or extend FGTS no later than 90 days prior to the expiration of the service period.

The customer may elect to renew the FGTS three year service periods only at the FGTS three year rate in effect at the time of renewal.

(C)

(C)

(D)

(D)

If the customer elects not to renew FGTS or does not notify the Telephone Company of its intent to renew FGTS, the customer's FGTS rate elements will revert to the monthly rates in effect, as set forth in Sections 7, 19 and 20, at the time the FGTS expires.

(C)

(C)

(C)

(4) Termination Charges

In the event service is terminated prior to the expiration of the Initial Service Period, termination charges will apply with the following exception. No termination charges will apply in the first year of the 3 year service period only, due to conditions in the government FGTS contract. After the first year, termination charges will apply as set forth following.

(C)

(C)

FGTS services are not subject to a termination liability charge for any services disconnected at the request of the Federal Government during the life of the contract. In the event service is terminated by an Interexchange Carrier termination charges will apply. The regulations

10.4 Rate Regulations (Cont'd)

(I) Federal Government Telecommunications Service (FGTS)(Cont'd)

(4) Termination Charges (Cont'd)

(M)

If Special Construction applied for the service being terminated, any associated termination charges, as referenced in 5.2.6 (C) (Special Construction), may apply.

(M)

(a) Initial Service Period

The termination charge for the Initial Service Period is calculated as follows:

Billed Monthly Rate X Months remaining in service period X Termination percentage.

Years in Service Period Termination Percentage

1	50%	(C)
3	40%	(C)

Example: A customer with a \$2,000 monthly rate terminates service with 5 months remaining in a 3 year service period. The termination charge would be calculated as follows:

$\$2,000 \times 5 \times .40 = \$4,000$ (C)

The termination charge would be \$4,000. (C)

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)11.1 General Description(A) Basic Service Description

Multi-service Optical Network (MON) Ring Service is a Special Access Service that provides high volume optical transport utilizing multiplexing technology in a dedicated ring configuration. Multiple data signals are transmitted over the same fiber-optic cable at the same time, using different wavelengths of light, in order to increase the amount of information that can be transferred. Each wavelength represents a transmission channel in the MON Ring system and is protocol independent of every other channel in the system.

Rates and charges for Multi-service Optical Network (MON) Service are set forth in Section 11.4 following, with the exception of the services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) in which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's Rules. The rates and charges for the Multi-service Optical Network (MON) Service in the MSAs that have received Phase II pricing flexibility are set forth in Section 39.

(N

(N

MON Ring Service allows customers to combine their multiple data signals so they may be amplified and transported over one network. MON Ring Service provides dedicated capacity over a single pair of fiber in two directions that increases capacity without limiting customer-required data interfaces.

The following regulations will apply to MON Ring Service:

- (1) MON Ring Service is only available under a three (3) or five (5) year Term Payment Plan (TPP) for which rates and charges are applicable. When a service is discontinued prior to the expiration of the minimum period, termination charges are applicable for the remaining portion of the minimum period.
- (2) Prior to confirming an order for service, the Telephone Company will provide a proposed route diagram to the customer. Installation will not begin until the customer has accepted the proposed routing by the Telephone Company.

(This page filed under Transmittal No. 2951)

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)

11.1 General Description (Cont'd)

(B) Service Provisioning

(1) Manner of Provisioning

MON Ring Service will be offered in two configurations. Customers can purchase MON Ring with growth capacity up to 16-wavelengths or up to 32-wavelengths. The 32-wavelength systems may be provisioned as two 16-wavelength systems sharing common fiber and common equipment. Conversions from 16-wavelength MON Rings to 32-wavelength MON Rings are not available.

Customer provided equipment (CPE) must deliver the data signals for the MON Ring Service transport within the technical specifications for the subscribed data service. Technical specifications can be found in the following Technical Reference Publications:

- AM TR-NIS-000100, Ameritech LAN Interconnect Service-Token Ring Interface Specifications
- AM TR-NIS-000104, Ameritech LAN Interconnect Service -CSMA CD Interface Specifications
- AM-TR-NIS-000111, Ameritech OC-3, OC-12, and OC-48 Service Interface Specifications
- AM-TR-TMO-000101, Ameritech Digital Service Transmission Parameters
- AM-TR-TMO-000080, Ameritech Service's Network Channel and Network Channel Interface Codes
- AM-TR-NIS-000096, Ameritech Technical Interfaces Specifications
- AM-TR-NIS-000107, (ESCON™)
- IBM SA22-7202-XX, IBM Documentation (ESCON™)
- IBM SA22-0394-XX
- ANSI X3.T9.3, Fibre Channel (also includes FICON™ and ISCTM)
- ANSI/IEEE 802.3, Fast Ethernet
- IEEE 802.3x and z, Gigabit Ethernet
- IEEE 802.3ae
- ANSI/SMPTE 259M, D1 Video

(D)
(D)

The customer must first order the MON Ring Transport System followed by the MON Ring Channels. When ordering ESCON™, Fast Ethernet, D1 Video and OC-3/OC-3c ports, the customer must first order a MON Ring Channel Sub-Rate System over which these services will be assigned. Subsequent changes to the initial provisioning of the service may require additional optical amplifiers and/or regenerators.

OC-12/OC-12c, Gigabit Ethernet, Fibre Channel and FICON™ ports at the 1.0625 Gbps speed may be ordered either on the MON Ring, or as a riding circuit on a Sub-Rate System. Fibre Channel and FICON™ ports at the 2.125 Gbps speed may only be ordered on the MON Ring, and are not available on a Sub-Rate System.

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)

11.1 General Description (Cont'd)

(B) Service Provisioning (Cont'd)

(1) Manner of Provisioning (Cont'd)

MON Ring Service provides physical layer transport only. Telephone Company assumes no responsibility for the signals generated by the CPE, or address signaling to the extent the CPE performs addressing. Error detection and correction of data generated by the CPE are the customer's responsibility.

(M)
|
(M)

Material appearing on this page previously appeared on 7th Revised Page 11-3.

(This page filed under Transmittal No. 2995)

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)

(N)

11.1 General Description (Cont'd)(B) Service Provisioning (Cont'd)(2) Limitations

- (a) Optical amplifiers and/or regenerators may have to be added to a MON Ring Service subsequent to the initial installation.
- (b) When any additional services are added, such installation may cause a service interruption to existing unprotected channels, or a protection switch on protected channels.
- (c) Services with time-delay sensitive protocols have facility length limitations and may affect the design/availability of MON Ring Service. The Telephone Company will work cooperatively with the customer to determine if the desired services can operate between the customers designated premises. These services will not be available on MON Rings nor between nodes where facility length limitations exceed the service specifications described in Sections 11.3(B)(1)&(2).
- (d) Neither electrical interfaces nor optical multiplexing are available with MON Ring Service.
- (e) Conversions from any other lower speed services to MON Ring Service are not available.
- (f) Channel protection may not be available for all interface types.
- (g) A protective channel provides protection for a single channel toward the network. It does not protect the channel against failure towards the customer interface. Protection reduces the maximum individual channel capacity of the system.

(3) Allowance for Service Interruptions

An interruption of service will start when an inoperative service is reported to the Telephone Company and end when the service is operative. In any month, as a result of an interruption, the total credit per rate element of the interrupted service may not exceed 100 percent of the monthly charge for that particular rate element as described in Section 2.5.6.

Any protected service interruptions greater than 2 consecutive seconds as a result of a failure on the protected portion of the circuit will result in a credit equal to one month's bill for the individual port-to-port connection

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)

(N)

11.1 General Description (Cont'd)

(B) Service Provisioning (Cont'd)

(4) MON Ring Configuration

MON Ring Service is available in different ring configurations utilizing central office nodes and customer premise nodes, with a maximum of eight sites and forty shelves. Each shelf supports 8 non-protected or 4 protected services. Its functionality includes supporting add/drop multiplexing, regeneration and amplification cards.

The minimum configuration would be two nodes either at a serving wire center or at a customer premises site. If the nodes are not in a serving wire center, a central office management site for monitoring is required. An optical amplifier located at a serving wire center can be used as a monitoring site.

A combination of these configurations may be used in a network design depending on the customer's traffic pattern.

Diagram of Mon Ring

(This page filed under Transmittal No. 2940)

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)

(N)

11.1 General Description (Cont'd)

(C) Responsibility of The Telephone Company

The Telephone Company will provision and maintain MON Ring Service for the customer up to and including the Network Interface (NI).

(D) Responsibility of Customer

The customer is responsible for providing the compatible CPE to be used for the connection to the MON Ring Service.

(E) Service Rearrangements

Service rearrangements are provisioning changes to existing (installed) services which do not result in either a change in the minimum period requirements or a change in the physical location of the point of termination at a customer premises, and will be charged as follows:

- (1) If changing the customer of record, the Administrative Charge will apply. For the changes of customer of record to be treated as a service rearrangement, the new customer must assume liability for both current and prior charges for the service.
- (2) For all other changes not requiring physical work at the central office, or customer premises, including a change in the customer assigned circuit identification or billing account number (when initiated by the customer), the Administrative Charge will apply.
- (3) For all other service rearrangements requiring physical work to be performed, the Administrative Charge will apply. Additionally, one Design and Central Office Connection Charge and one Customer Connection Charge per customer premises node will apply.

(N)

(This page filed under Transmittal No. 2940)

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)

(N)

11.2 Route Diversity

MON Ring Service is configured with diversely routed fiber whenever possible. Unprotected channels will be lost in the event of a fiber path failure on which the circuit is assigned. Equipment interfaces towards the customer are not protected.

Routing of fiber may be diversified from the customer premises to their serving wire center or alternate serving wire center as determined by the Telephone Company, and where facilities are available, to ensure that loop fibers follow separate paths to the serving wire center or alternate serving wire center. In addition, IOF (interoffice facility) fiber paths may be diversified to ensure that at any serving wire center drop node, the fibers do not egress and ingress at the same location. In cases where the serving wire center does not have multiple entrance fiber facilities, the section of the fiber from the manhole closest to the serving wire center will be routed within the same duct structure.

At the customer's request, additional protection to the customer premises nodes can be provided via dual entrance facilities. This special request will cause the customer to incur special construction cost. Without this special request, diverse fiber is provided to the manhole closest to the customer premises. The customer or building owner is responsible for providing the conduit.

In the case where dual entrance facilities are not established at the customer premises, collapsed facilities from the customer premises to the building equipment location are not diverse.

11.3 Rate Regulations(A) Rate Elements

There are eight basic rate elements which apply to the MON Ring Service:

(1) Nonrecurring Charges

These are one-time charges that apply for specific work activities (i.e., installation of new service, moves, and rearrangements of installed services). There are three different nonrecurring charges:

- (a) Administrative Charge - applies any time a customer initiates an order for service. This charge applies once per customer order.
- (b) Design and Central Office Connection Charge - applies once for the initial MON Ring installation, and applies once for each circuit ordered on the MON Ring Service.
- (c) Customer Connection Charge - applies to establish the MON Ring network, and is charged per node. Subsequent installation charges apply to each subsequent shelf installed after the MON Ring network is established.

(N)

(This page filed under Transmittal No. 2940)

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)

(N)

11.3 Rate Regulations (Cont'd)(A) Rate Elements (Cont'd)(2) Customer Premises Node

Provides for the termination of service at the customer's premises and presents the various selected ports to the customer. Applies per customer designated premises, per first shelf and subsequent shelves.

(3) Central Office Node

Provides for the termination of service at a Telephone Company serving wire center. Applies per first shelf and subsequent shelves.

(4) Channel Mileage

Provides for the transmission facilities between the serving wire centers associated with the customer designated premises. The mileage measurement is developed utilizing the V&H coordinate method as set forth in the National Exchange Carrier Association, Inc. (NECA) Wire Center Information Tariff, F.C.C. No. 4. A one-mile minimum will be billed between nodes. A two-node ring configuration has a two mile minimum, one mile from the central office node to the customer premises node, and one mile from the customer premises node to the central office node.

(5) Optical Amplifier

Provides for an optical signal boost and applies when the distance between nodes exceeds the transmission loss parameters (link loss specific). Optical amplifiers are located at the customer premises node, a central office node, or a serving wire center. Each amplifier provides amplification for up to 16 channels per location (one amplifier per C or L band).

(6) Regenerator

Provides for re-timing, re-shaping, and regeneration when the degradation of the signal exceeds the dispersion and/or optical amplifier noise limits. Applies on a per shelf basis for up to 2.5 Gbps services and on a per circuit basis for up to 10 Gbps service.

(7) Bulk Power

Provides for customer premises node power, which will be required if the customer's power source is AC. Applies once per 4 shelves, with the first shelf and fifth subsequent shelf at each applicable customer premises node.

(N)

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)

(N)

11.3 Rate Regulations (Cont'd)(A) Rate Elements (Cont'd)(8) Port

Provides for the channel interface at any node location for each unprotected or protected channel. Applies per port/per circuit terminating location. Charges will apply at the lower speed circuit level.

(B) MON Ring Connection Capacity

MON Ring Service offers the following port interfaces:

(1) IBM Protocols:

ESCON^{TM/1/} (200 Mbps) - Enterprise Systems Connection. An IBM duplex optical connection used for computer-to-computer data exchange. ESCONTM is limited to a maximum distance of 43 km and actual data throughput is distance sensitive.

ETR^{TM /1/} (8 Mbps - Manchester Encoded) - External Timing references. This protocol is used for IBM GDPSTM architecture for multiple-location host processors. ETRTM is limited to a maximum distance of 40 km.

FICON^{TM/1/} (1.0625 and 2.125 Gbps) - A higher-speed evolution of ESCONTM, enabling 1 Gbps connectivity among mainframes, storage devices and peripherals. FICONTM is limited to a maximum distance of 100 km and actual data throughput is distance sensitive.

ISC^{TM//1/} (1.0625 Gbps) - Inter-System Coupling. This protocol is used with IBM GDPSTM architecture for multiple-location host processors. ISCTM is limited to a maximum distance of 40 km.

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)11.3 Rate Regulations (Cont'd)(B) MON Ring Connection Capacity (Cont'd)

(2) Other Protocols:

Fibre Channel (1.0625 and 2.125 Gbps) - an industry standard protocol used to interconnect Storage Area Networks (SANs). Fibre Channel is limited to a maximum distance of 100 km and actual throughput is distance sensitive.

Fast Ethernet - a version of Ethernet that allows data transmission rates of 100 Mbps.

Gigabit Ethernet - a version of Ethernet that allows data transmission rates of 1 Gbps.

10 Gigabit Ethernet (WAN-PHY) - a version of Ethernet that allows data transmission rates of 9.953 Gbps with a WAN-PHY only interface. (T)

10 Gigabit Ethernet (LAN-PHY)- a version of Ethernet that allows data transmission rates of 10.3125 Gbps with a LAN-PHY only interface. (N)
(N)
(N)

D1 Video - uncompressed digital video signal operating at 270 Mbps.

GigE/FC/FICON™ Sub-Rate System (2:1) - provides a multiplexing system which allows customers to put 2 Gigabit Ethernet (GigE) Channels, 2 Fibre Channels or 2 FICON™ Channels on one port card. (N)

ESCON™ Sub-Rate System (8:1) - provides a multiplexing system which allows customers to put up to 8 ESCON™ Channels (no other protocol) on one port card.

OC-3/OC-12 Sub-Rate System (4:1) - provides a multiplexing system which allows customers to put up to 4 OC-3/OC-3c signals or combinations thereof on one card. This sub-rate multiplexing system will have independent timing which allows multiple OC-3/OC-3c services and/or OC-12/OC-12c services on one Sub-Rate card. (N)

11.3 Rate Regulations (Cont'd)

(B) MON Ring Connection Capacity (Cont'd)

(2) Other Protocols: (Cont'd)

SONET OC-3/OC-3c* - provides a fiber-based 155.52 Mbps synchronous optical full duplex data transmission capability.

SONET OC-12/OC-12c* - provides a fiber-based 622.08 Mbps synchronous optical full duplex data transmission capability.

SONET OC-48/OC-48c* - provides a fiber-based 2488.32 Mbps synchronous optical full duplex data transmission capability.

SONET OC-192/192c* - provides a fiber-based 9953.28 Mbps synchronous optical full duplex data transmission capability. (N)

Sub-Rate System* - provides a multiplexing system operating at 1.25 Gbps with 4 ports. Applicable to OC3 port interfaces.

Sub-Rate System - provides a multiplexing system operating at 1.25 Gbps with 4 ports. Applicable to ESCON™, Fast Ethernet, and D1 Video port interfaces.

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)

(N)

11.3 Rate Regulations (Cont'd)(C) Term Pricing Plan(1) General Description

MON Ring Service Term Pricing Plan (TPP) provides the customer with discounted tariff rates for a three or five year term period. During the length of the selected TPP, monthly rates for service ordered under the plan will automatically change (increase or decrease), as Telephone Company initiated rate changes become effective. However, under no circumstances will any rate change cause the monthly rate for the service to exceed the rate that was in effect at the beginning of the selected TPP. The Telephone Company will notify customers participating in a TPP when monthly rates are increased or decreased. When customer's term agreement expires, if customer does not subscribe to a new service or choose to disconnect service, the customer's service will automatically convert to monthly extension rates.

(2) TPP Renegotiations

The customer may choose to terminate an existing TPP at any time prior to the end of the three or five year term period and renegotiate a new TPP without termination liability provided the new TPP meets the following requirements:

- (a) The minimum period for the new TPP must be equal to or of greater duration than the remaining period of the existing TPP.
- (b) The renegotiated TPP will be based on the current rates.

(3) Additions

Any MON Ring rate elements (as shown in Section 11.4) added to the existing service configuration after the expiration of 25 months of a 36 month TPP term, or 42 months of a 60-month TPP term, will be billed under the tariffed monthly extension rates.

(N)

(This page filed under Transmittal No. 2940)

ACCESS SERVICE

11. Multi-service Optical Network (MON) Ring Service (Cont'd)

(N)

11.3 Rate Regulations (Cont'd)(C) Term Pricing Plan (Cont'd)(4) Termination of Service

Customer requesting termination of service prior to the expiration date of the TPP for any reason will be liable for a termination charge, which is calculated as follows:

Billing Period	Termination Percentage
3 Year	75%
5 Year	60%

(Monthly Recurring X (Months Remaining X (Termination
Rates) in Billing) Percentage)

Example:

A MON Ring Customer with \$50,000 monthly rate terminates service after 2 years with 1 year (12 months) remaining in a 3 year TPP. The termination liability would be calculated as:

$$\$50,000 \times 12 \times .75 = \$450,000.00$$

(5) Moves

If during the duration of the TPP, the customer wishes to rearrange or move a customer premises node, a termination charge will apply.

(1) Service Expiration Date: August 27, 2000

(2) The billing period for this service is 36 months. In the event this service is terminated prior to the end of the billing period, MOREnet/SOM will pay the Telephone Company the net present value of all remaining payments, calculated with a discount rate equal to the Telephone Company's interstate special access rate of return authorized by the F.C.C. at the time of termination. The termination charge is calculated using the following value formula:

$$\text{Present Value} = \frac{\text{Rate} \times (1 - (+i)^{-n})}{i}$$

Rate = monthly recurring rate

n = total number of months remaining for the service

i = monthly interest rate (discount rate) expressed as a

decimal

(3) In the event this Service becomes the subject of a general tariff service offering, MOREnet/SOM shall be required to either terminate the Service or convert the Service to the general tariff offering at the rates, terms and conditions provided thereunder. No termination charges shall apply in either instance.

(4) This Charge is applicable for each installation of the Interface Processor Router.

(5) The system design can not exceed the capacity of the Router.

<u>Case No.</u>	<u>Customer Name</u>	<u>Volume Tier*</u>	<u>Monthly Rate for each Active Port</u>
00-SBC-1	MCI WorldCom Network Services, Inc.	1 - 200,000	\$12.00

Description

Remote Access Service (RAS) provides an ISDN PRI-based data transport service that supports MCI WorldCom Network Services, Inc. with medium to high speed transport capabilities for end user remote dial access to MCI WorldCom Network Services, Inc.'s internet network. RAS terminates in network access servers in Southwestern Bell Telephone Company's central offices, which provide modem functionality. The connections between the central office and MCI WorldCom Network Services, Inc.'s network are not part of RAS. MCI WorldCom Network Services, Inc. will acquire these services separately.

MCI WorldCom Network Services, Inc. agrees to maintain a minimum of 148,800 active ports each month beginning March 27, 2003. MCI WorldCom Network Services, Inc. agrees to pay a monthly rate on a per port basis as outlined in the volume tier listed above. The volume tier is an aggregation of ports ordered by MCI WorldCom Network Services, Inc. through the tariffs and in the territories of Southwestern Bell Telephone Company, Pacific Bell Telephone Company, The Southern New England Telephone Company, Ameritech Operating Companies, and Nevada Bell Telephone Company (hereinafter referred to as The Telephone Companies). In the event that MCI WorldCom Network Services, Inc. does not have 148,800 active ports during a given month after March 27, 2003, MCI WorldCom Network Services, Inc. agrees to pay The Telephone Companies the monthly rate for 148,800 ports in each such month regardless of the actual number of active ports. This modified arrangement shall expire as of the end of month twenty four (24) from March 27, 2003 and is limited to 200,000 ports. (C)

1. In the event this service becomes the subject of a general tariff service offering, MCI WorldCom Network Services, Inc. shall be required to either terminate the service or convert the service to the general tariff offering at the rates, terms and conditions provided thereunder; No termination charges shall apply in either instance.
2. The rate and the terms and conditions of this subsection will not change during the term period of this specialized arrangement, unless noted herein or required by the F.C.C. All other tariff changes will apply accordingly.
