6.8.2 Description and Application of Rates and Charges (Cont'd)

(C) Nonrecurring Charges* (Cont'd)

(C)

(5) Service Rearrangements

Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements as set forth in 5.2.5 preceding or a change in the physical location of the point of termination at the customer's premises or the customer's end user's premises. Changes which result in the establishment of new minimum period obligations are treated as disconnects and starts. Changes in the physical location of the point of termination are treated as moves and are described and charged for as set forth in 6.8.6 following.

The charge to the customer for the service rearrangement is dependent on whether the change is "records only" in nature or involves an actual physical change to the service.

The service rearrangement charge will not apply for service rearrangements associated with removing existing, optional local switching features subject to the following criteria. The service must have been in effect as of December 31, 1991; Access Service requests must be received by June 30, 1993; and the rearrangement is to remove existing features or BSEs that are being unbundled. The service rearrangement charge will apply for any rearrangement orders which are received after June 30, 1993 or prior to June 30, 1993 when any additions or other changes or rearrangements are made, except for the removal of existing, optional local switching features.

* For Services ordered under MVP, refer to Section 19.3(E)(5).

(C) Nonrecurring Charges* (Cont'd)

(C)

(5) Service Rearrangements (Cont'd)

Certain "records only" changes will be made without charge(s) to the customer. Such changes require the continued provision and billing of the Access Service to the same entity (i.e., customer remains responsible for all outstanding indebtedness for the Access Service). The following are examples of "records only" changes:

- Change of customer name (i.e., the customer of record does not change but rather the customer of record changes its name--e.g., AT&T-Long Lines to AT&T-Communications) Change of customer or customer's end user premises address when the change of address is not a result of a physical relocation of equipment,
- Change in billing data (name, address, or contact name or telephone number),
- Change of customer or customer's end user contact name or telephone number,
- Change of Percentage for Interstate Use, and
- Change of Feature Group D ordering basis (from BHMC to trunks or from trunks to BHMC)

The Administrative Charge will apply for the following rearrangements. Only one such charge will apply per order. If the rearrangements are initiated by the Telephone Company, or if the rearrangements are necessary to conform Telephone Company records to MECAB or MECOD requirements for jointly provided services, no charge will apply.

- Change of customer assigned circuit identification
- Change of billing account number, when initiated by the customer
- Change of customer assigned test line number

* For Services ordered under MVP, refer to Section 19.3(E)(5).

6.8 Rate Regulations (Cont'd)

6.8.2 Description and Application of Rates and Charges (Cont'd)

(C) Nonrecurring Charges* (Cont'd) (C)

(5) Service Rearrangements (Cont'd)

- Change of customer of record (i.e., Access Service is provided and billed to a different entity) where no physical relocation or rearrangement of the service is required. For the change of customer of record to be treated as a service rearrangement, the new customer must assume liability for both current and prior charges for the service.
- Rerouting of interoffice facilities from tandem to direct end office routing or end office to tandem routing when all of the following conditions apply:
 - The interoffice facilities must be used to provide trunk side switched transport;
 - All rearrangement orders must identify the existing interoffice facilities and/or trunks to be rearranged on a "one for one" or equivalent basis based on industry accepted engineering standards;
 - The customer must place the order to connect at the tandem or end office at the same time the order is placed to disconnect from the end office or tandem. The due date of the disconnection order can not be more than six months past the due date of the order to install the tandem or end office trunk;
 - The customer must maintain their same Point of Presence (POP) location with the same technical specifications, e.g., interface type; and
 - The Telephone Company must receive the orders to connect at the end office or tandem by May 11, 1995 with a due date no later than November 11, 1995.

* For Services ordered under MVP, refer to Section 19.3(E)(5). (C)

(C) Nonrecurring Charges* (Cont'd)

(C)

(5) Service Rearrangements (Cont'd)

For all other rearrangements, including the addition of, or modification to, optional features without separate nonrecurring charges, both the Administrative Charge and the Design and Central Office Connection Charge will apply, except as indicated below. For rearrangements involving changes to optional features associated with Dedicated Access Line Services, the line side type nonrecurring charges will apply.

- When an optional feature is not required on each transmission path, but rather for an entire transmission path group, end office, or access tandem switch, only one Design and Central Office Connection Charge will apply (i.e., it will apply per group or office rather than per transmission path.) The Administrative Charge will also apply.
- When a customer adds the 64 Clear Channel Capability option described in 6.1.3 preceding, the Customer Connection Charge will apply in addition to the Administrative Charge and the Design and Central Office Connection Charge.
- When a customer adds the LT-1 Clear Channel Capability option described in 6.1.3 preceding to an existing LT-1 Direct Transport service, only the nonrecurring charge specified in Section 6.9.3 will apply.*
- When a customer adds the LT-1 Clear Channel Capability option to an existing LT-1 Direct Transport service and, at the same time, converts the Feature Group D and/or terminating Feature Group B service provided on that LT-1 Direct Transport service from MF to SS7 signaling, no nonrecurring charges will apply.
- For rearrangements involving the customer specification of transport termination optional features described in Section 6.3.2, the Customer Connection Charge will apply, in addition to the Administrative Charge and the Design and Central Office Connection Charge.

* For Services ordered under MVP, refer to Section 19.3(E)(5).

(5) Service Rearrangements (Cont'd)

- The Service Class Routing - Translations Only Rearrangements charge will apply for the addition or deletion of, or modification to Service Class Routing on existing trunks, as described in 6.3.1(N) preceding. The charge application is set forth in Section 6.9.3(A). The Administrative charge will also apply per service order.
- The CIC Code Level/Alternate Routing - Translations Only Rearrangements charge will apply as set forth in Section 6.9.3(A) for changes in CIC Codes and/or Alternate Traffic Routing as described in Section 6.3.1(A) and for the addition of, modification to or the deletion of common switching features on existing trunks. Examples of these common switching features are:
 - Called Billing Number Delivery (ANI) - as described in Section 6.3.1(B)
 - International Dialing - as described in Section 6.3.1(L)
 - Cut-Through - as described in Section 6.3.1(F)
 - Feature Group D with 950 Access - as described in Section 6.3.1(T)

This charge also encompasses CIC Code changes for Feature Group B, C and D trunks.

The Administrative charge will also apply per service order.

- A Design and Central Office Connection charge will apply per CIC code, per trunk group, per end office and/or tandem as applicable. For example, the Design and Central Office Connection charge will apply:
 - per CIC code, per trunk group, per end office if translation rearrangements are required at the end office as in the case of direct trunked traffic.
 - per CIC code, per trunk group, per tandem and per sub-tending end office(s) when traffic is carried over a two-way tandem switched trunk group.
 - per CIC code, per trunk group, per tandem in the case of terminating-only Feature Group B traffic that is tandem switched using a one-way trunk group.

In the case where one customer's service is carried over another customer's trunks, the latter's trunk type will determine the charges to be applied.

* For Services ordered under MVP, refer to Section 19.3(E)(5).

(5) Service Rearrangements (Cont'd)

The Design and Central Office Connection charge will apply as depicted:

	Per CIC Code	Per Trunk Group	Per End Office	Per Tandem Office
Tandem Switched Two-way Trunk	X	X	X	X
One-way Trunk Originating	X	X	X	X
Terminating	X	X		X
Direct Trunk	X	X	X	

- If the customer orders a Translations Only Rearrangements combination of a Service Class Routing rearrangement and one or more of the rearrangement activities that are assessed the CIC Code Level/Alternate Routing charge, only the Service Class Routing rearrangements charge as set forth in Section 6.9.3(A) and the Administrative Charge will apply under the following conditions.
 - All the rearrangement activities are performed within the same trunk group
 - All the rearrangement activities are ordered on the same order
 - All the rearrangement activities have the same due date
- When the customer requests trunk group rearrangements that only require software translations work, such as transferring trunks from one existing trunk group to another existing trunk group between the same points, then the Software Translations Trunk Rearrangements charge will apply as set forth in Section 6.9.3(A). The Administrative Charge will also apply.

* For Services ordered under MVP, refer to Section 19.3(E)(5).

(5) Service Rearrangements (Cont'd)

- If, due to technical limitations of the Telephone Company a customer could not combine its 500 Access Service traffic, 800 traffic and/or 900 Access Service traffic with its other trunk side Switched Access Services, no charge shall apply to combine these trunk groups when it becomes technically possible.

(6) 500 Access Service Changes

A nonrecurring charge as specified in 6.9.3(B) following applies to each change involving the additions or deletions of 500 NXX codes to be routed to a customer in the operating territory of the Telephone Company. For each Telephone Company end office switch or access tandem in which translation changes are required to route 500 NXX calls to the customer, a one-time charge applies.

A nonrecurring charge as specified in Section 6.9.3(B) following applies for the activation of the 0+ Option. This charge will be assessed for each Telephone Company end office or access tandem in which translations changes are required to activate the 0+ Option. This charge is in addition to any applicable 500 Access Service nonrecurring charges.

Additional charges apply for the initial loading of each 500 NXX code required to establish service and to any subsequent changes to these codes. If the changed 500 NXX codes are used for both interstate and intrastate 500 Access Service, the Percentage for Interstate Use (PIU) will apply per Section 2.3.11. The Administrative Charge will also apply. The Design and Central Office Connection and Customer Connection Charges will not apply.

* For Services ordered under MVP, refer to Section 19.3(E)(5).

(7) 900 Access Service Changes

A nonrecurring charge as specified in 6.9.3(B) following applies to each change involving the additions or deletions of 900 NXX codes to be routed to a customer in the operating territory of the Telephone Company. For each Telephone Company end office switch or access tandem in which translation changes are required to route 900 NXX calls to the customer, a one-time charge applies.

A nonrecurring charge as specified in Section 6.9.3(B) following applies for the activation of the 0+ Option. This charge will be assessed for each Telephone Company end office or access tandem in which translations changes are required to activate the 0+ Option. This charge is in addition to any applicable 900 Access Service nonrecurring charges.

Additional charges apply for the initial loading of each 900 NXX code required to establish service and to any subsequent changes to these codes. If the changed 900 NXX codes are used for both interstate and intrastate 900 Access Service, the Percentage for Interstate Use (PIU) will apply per Section 2.3.11. The Administrative Charge will also apply. The Design and Central Office Connection and Customer Connection Charges will not apply.

(9) Data Base Services (Cont'd)

(1) 800 Service (Cont'd)

For 800 Service using the 800 Carrier-ID-Only function, an Administrative Charge applies for each 800 Service Carrier-ID-Only Access Order and an Originating Point Code (OPC) charge as set forth in 6.9.1(D) applies for each OPC established. An OPC charge also applies for each OPC added or changed subsequent to the establishment of STP Port Access.

(10) Switched Transport Services

(a) Administrative Charge

Switched Transport Services Nonrecurring Charges will not apply when the customer initiates the order for Voice Grade Switched Transport Service concurrent with the Feature Group A Switched Access Service.

(b) Design and Central Office Connection Charge

A Design and Central Office Connection Charge is applied to each Switched Transport service provided on a per facility basis. A separate Design and Central Office Connection Charge also applies for each lower speed Switched Transport service provided on a channelized higher speed Switched Transport service. In addition, the Switched Access Services Design and Central Office Connection Charge as specified in Section 6.8.1(C)(2) preceding applies to each Switched Access Service line or trunk activated on a Switched Transport service.

* For Services ordered under MVP, refer to Section 19.3(E)(5).

(C) Nonrecurring Charges* (Cont'd)

(10) Switched Transport Services (Cont'd)

(b) Design and Central Office Connection Charge (Cont'd)

The Design and Central Office Connection Charge is applied once for both the Direct Transport service or Tandem-Switched Transport service and the associated Entrance Facility when the two facilities are provided at the same time, operating at the same speeds and are provisioned as a single circuit between the customer's premises and the end office, hub or access tandem.

The Design and Central Office Connection Charge is applied separately, once for the Entrance Facility and once for the Direct Transport service or Tandem-Switched Transport service when the services are not provisioned at the same time or the services operate at different transmission speeds.

The Design and Central Office Connection Charge for Entrance Facilities, Direct Transport Services and Tandem-Switched Transport Services varies depending on the transmission speed of the services as set forth in 6.9.6 following.

(c) Customer Connection Charge

A Customer Connection Charge is applied on a per point of termination basis to each Entrance Facility installed.

The Customer Connection Charge varies depending on the transmission speed of the Entrance Facility. The Customer Connection nonrecurring charges for Entrance Facilities are set forth in 6.9.6 following.

* For Services ordered under MVP, refer to Section 19.3(E)(5).

(11) Service Guarantees

Switched Trunk Installation/Rearrangement Guarantee

If, in the process of installing or rearranging Feature Group B, C or D trunking, the Telephone Company fails to meet the installation interval service date (as specified in Ameritech Interval Guide Publication AM-TR-MKT-000066) or is responsible for a switch translation error(s), the Company will credit the applicable Administrative and Design and Central Office Connections Charges and/or Customer Connection Charges associated with the service order.

Switched Transport Installation Interval Guarantee

A failure to meet the installation interval service date for LT-1 or LT-3 Switched Access Transport services (as specified in Ameritech Interval Guide Publication AM-TR-MKT-000066), will result in a customer credit of the nonrecurring charges, (Administrative, Design and Central Office and Customer Connection) billed to the customer for that service, where the responsibility for the failure is solely the Ameritech Operating Companies:

The installation guarantees do not apply to any installations involving the following circumstances:

1. Other Telephone Companies are designated as the billing company as set forth in Section 2.4.7 preceding or Ameritech is the billing company as set forth in 2.4.7(B)(3) and 2.4.7(B)(4) preceding.
2. The customer's premises is inaccessible.
3. The customer changes interface requirements.
4. The customer is not ready to accept service.
5. Building facilities are not ready (includes space, cable support structure, building risers and entrance facilities to be provided by builder or owner or owner's subcontracted vendors).
6. The customer orders termination beyond the Network Interface.

* For Services ordered under MVP, refer to Section 19.3(E)(5).

(C)

(12) Temporary Waiver of Nonrecurring Charges

Nonrecurring charges associated with the conversion of a customer's tandem switched transport to direct trunked transport or with the disconnection of over-provisioned trunks resulting from such conversion will be waived in compliance with the Commission's First Report and Order in Access Charge Reform, CC Docket No. 96-262, FCC 97-158, released May 22, 1997.

Nonrecurring charges that will be waived include charges for both Switched Transport facilities and the charges associated with the Switched Access trunks that are provided on Switched Transport facilities. In addition, the nonrecurring charges associated with new Direct Transport Service from the existing tandem office to the existing serving Wire Center or from a tandem's subtending end office to the existing serving wire center for the purpose of maximizing the customer's network efficiency will be waived.

In order for the waiver of nonrecurring charges to apply, the Telephone Company must receive the orders to rearrange, rehome or upgrade services no later than January 1, 1999.

* For Services ordered under MVP, refer to Section 19.3(E)(5).

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.2 Description and Application of Rates and Charges
(Cont'd)

(D) Application of Rates

The Residual Charge, the CAP Transport Residual Credit, Local Switching and the Information Surcharge rates are applied either as premium rates or transitional rates.

C

Rates for Switched Transport Entrance Facilities, Direct Transport services, Tandem Switched Transport and Data Base Services are applied equally to all customers regardless of the availability of equal access capabilities.

Dx

Dx

The specific application of premium and transitional rates for a specific customer is dependent upon the type of service and the availability of equal access capabilities in the end office to which the service is provided. Except for features classified as basic service elements (BSEs), rates for optional features are not applied on premium and transitional basis, but rather apply equally to all customers regardless of the type of office with which they are associated or the availability of equal access capabilities in the end office.

For BSEs, transitional and premium rates will apply with the transitional rates calculated by multiplying the premium rate by .45 and rounding to the number of decimal points displayed in the rate.

The bundled Local Switching rate will apply for customers choosing to retain bundled switched access services and the Unbundled Local Switching rate will apply for customers choosing the unbundled option as described in Section 5.2, preceding.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.2 Description and Application of Rates and Charges (Cont'd)

(D) Application of Rates (Cont'd)

For those rates that are applied as either premium or transitional, the rules for applying premium and transitional rates are provided in (1) through (3) following.

(1) Premium rates apply to all FGC and FGD access minutes (including 800 traffic), to all FGA, FGB, 500 Access Service and 900 Access Service access minutes that originate from or (for FGA and FGB) terminate at end offices equipped with equal access (i.e., FGD) capabilities and to access minutes that originate from or terminate at end offices not equipped with equal access capabilities when the service is provided to customers which furnish interstate MTS/WATS. Sy

(2) Transitional rates (i.e., discounted access minute rates) apply to all FGA, FGB and 900 Access Service access minutes (measured or assumed) that originate from or (for FGA and FGB) terminate at end offices which are not equipped with equal access capabilities. Cx

(3) When FGA or FGB Switched Access Service provided to an entry switch (i.e., dial tone office for FGA and access tandem for FGB) has usage originating from and/or terminating at both end offices that have been converted to equal access and end offices that have not been converted, the premium and transitional rates for Switched Access Service (including the Carrier Common Line Charge) will apply in the following manner:

(a) All access minutes that originate from or terminate at the equal access end office(s) will be billed at premium rates. Access minutes that originate from or terminate at end offices not equipped with equal access capabilities, hereinafter referred to as non-premium access minutes, will continue to be billed at transitional rates. Transitional rates will apply as follows:

(i) The number of non-premium access minutes to be billed at transitional rates is derived by subtracting the number of premium rated access minutes from the total number of access minutes.

(ii) Premium access minutes will be determined as set forth in (b) following.

x Issued under authority of Special Permission No. 95-100.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.2 Description and Application of Rates and Charges (Cont'd)

(D) Application of Rates (Cont'd)

(3) (Cont'd)

(b) The number of access minutes to be rated as premium access minutes is determined as follows:

(i) Where measurement capability exists, and end office specific usage data is available, premium rates will apply to all access minutes originating from or terminating at equal access end offices.

(ii) Where measurement capability does not exist and/or end office specific usage data is not available, originating and/or terminating usage will be apportioned between premium and non-premium usage as described following. The usage to be apportioned will be the recorded usage or the assumed usage as set forth in 6.8.7 following. Such apportionment will be based on the ratio of the number of subscriber lines in the access area (i.e., local calling area, LATA or end offices subtending the access tandem, as appropriate) of the entry switch that are served by equal access end offices to the total number of subscriber lines in that access area. The ratio thus developed is applied to the total measured or assumed originating FGA usage, terminating FGA usage, originating FGB usage or terminating FGB usage, as applicable, to determine the usage to be billed at premium rates, unless adjusted as set forth in (iii) following.

The ratios used to determine the premium usage will be updated on a quarterly basis. This information is provided in the customer's monthly bill.

For purposes of administering this provision: (1) subscriber lines are defined as exchange service lines, Centrex lines and

(b)(Cont'd)

(ii) (Cont'd)

Centrex-type lines provided by the Telephone Company under its local and/or general exchange service tariff; (2) the access area is defined as the local calling area of the dial tone office for originating FGA, the entire LATA for terminating FGA, and all end offices subtending the access tandem for originating and terminating FGB; and (3) the local calling area of the dial tone office is as defined in the Telephone Company's local and/or general exchange service tariff.

- (iii) Where FGD Switched Access Service is provided to a customer in an end office(s) where FGA or FGB premium access minutes have been determined in accordance with (ii) preceding, such premium access minutes will be adjusted in the following manner. For each FGD access minute originating from or terminating at that end office, excluding FGD provided with PSDS capability and Operator Transfer Service, the originating or terminating FGA or FGB premium access minutes determined as set forth in (ii) preceding will be reduced on a one for one basis, but in no event shall the reduction exceed the total number of FGA or FGB premium access minutes originating from or terminating at that end office. The customer will be billed for the revised number of premium access minutes.

When toll free traffic, 500 Access Service and/or 900 Access Service traffic has been combined in the same trunk group arrangement with the customer's Feature Group D traffic, the 800, 500 Access Service and/or 900 Access Service access minutes shall not be used to offset premium rates as set forth preceding.

Effective: March 1, 1996

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.2 Description and Application of Rates and Charges (Cont'd)

(D) Application of Rates (Cont'd)

(3) (Cont'd)

- (c) Where originating and/or terminating recording capability does not exist for FGA, the assumed number of access minutes will be as set forth in 6.8.8 following.

The Telephone Company will provide written notification to all access customers of record within a particular LATA that an end office in that LATA is scheduled to be converted to an equal access end office. This notification will be sent, via certified U.S. Mail, to each customer of record in the LATA where the conversion is scheduled to occur, at least six months in advance of the conversion date.

The customer will have the choice of converting existing services to equal access (i.e., Feature Group D) at no charge pursuant to the conditions set forth in 6.8.6 following or retaining the existing services. Premium rates will apply to the total access minutes beginning on the actual conversion date, whether the customer chooses to convert to FGD or retain existing services.

(4) Tandem-Switched Transport Rate Application

Tandem-Switched Transport rates are usage sensitive and are applied equally to all customers except as noted in herein. The rate application for the Tandem-Switched Transport rate elements is as follows:

(a) Tandem-Switched Termination Rate

The Tandem-Switched Termination rate is assessed to all switched access minutes that are transported over Tandem-Switched Transport Services, except where Tandem-Switched Transport Services originate or terminates to a Class 4/5 switch.

(C)
(C)

(This page filed under Transmittal No. 1260)

(D) Application of Rates (Cont'd)

(4) Tandem-Switched Transport Rate Application (Cont'd)

(b) Tandem Switched Facility Rate

The Tandem-Switched Facility rate is assessed on a per minute per mile basis to all switched access minutes that are transported over Tandem-Switched Transport Services.

For purposes of determining Tandem-Switched Facility mileage, distance will be measured as set forth in Section 6.8.12 following.

(c) Tandem Switching Rate

The Tandem Switching rate is assessed on a per access minute basis for all switched access minutes that are transported over Tandem-Switched Transport Services and are switched at a Telephone Company access tandem switch.

The Tandem Switching rate will not apply to access minutes that originate or terminate at the end office part of a Class 4/5 switch.

(D)
(C)
(C)

The Tandem Switching rate will not apply to Tandem-Switched Transport provided in conjunction with FGA Switched Access Service.

The rates for Tandem-Switched Termination, Tandem-Switched Facility and Tandem Switching are set forth in Section 6.9.1 following.

ACCESS SERVICE**6. Switched Access Service (Cont'd)****6.8 Rate Regulations (Cont'd)****6.8.2 Description and Application of Rates and Charges (Cont'd)****(D) Application of Rates (Cont'd)****(5) Entrance Facility and Direct Transport Service Rate Application**

Switched Transport Entrance Facilities and Direct-Trunked Transport Services are provided via transmission facilities operating at three different transmission speeds. For Entrance Facilities and Direct-Trunked Transport Facilities these are Voice Grade (300 to 3000 Hz), LT-1 (1.544 Mbps) and LT-3 (44.736 Mbps). There are three levels of Direct-Trunked Transport Facility rates corresponding to the available transmission speeds. Virtual Direct-Trunked Transport Services are only available via transmission facilities operating at 1.544 Mbps and are offered at the same rate as LT-1 Direct-Trunked Transport Services.

(a) Entrance Facilities

One flat monthly Entrance Facility charge applies per customer designated premises at which an Entrance Facility channel is terminated. This charge will apply even if the customer designated premises and the serving wire center are located in the same building.

(b) Direct Transport Services

The Direct Transport rate category is composed of two flat rated monthly recurring rate elements. These are the Direct Transport Channel Mileage Termination and the Direct Transport Channel Mileage rate elements.

One Direct Transport Channel Mileage Termination charge applies per end of the Channel Mileage that terminates in the Telephone Company's serving area. The Channel Mileage Termination charge does not apply to Direct Transport circuits if the customer's serving wire center and the end office are in the same central office.

The Direct Transport Channel Mileage charge applies per mile of interoffice transport provided over Direct Transport services. The Channel Mileage charge does not apply to Direct Transport circuits if the interoffice mileage is zero. The mileage measurement for determining the monthly rate for Direct Transport Channel Mileage is specified in Section 6.8.13.

6.8.2 Description and Application of Rates and Charges (cont'd)

(D) Application of Rates (cont'd)

(5) Entrance Facility and Direct Transport Service Rate Application (cont'd)

(b) Direct Transport Services (cont'd)

T

The rates for Entrance Facilities, Direct Transport Channel Mileage Terminations and Direct Transport Channel Mileage are set forth in Section 6.9.6 following.

(6) Optional Payment Plan (OPP) for LT-1 and LT-3 Switched Transport Services

(a) General

The Optional Payment Plan is a provision that allows a customer to select LT-1 and LT-3 Entrance Facilities, Direct Transport and Multiplexing Service over a 12, 36, or 60 month payment period. Monthly rates for service installed under this Payment Plan will change as Telephone Company initiated rate charges become effective, but during the OPP term, will not exceed the monthly rate in effect at the beginning of the customer's OPP term.

During the term of the selected OPP, Telephone Company initiated rate changes (increases or decreases) will automatically be applied to the monthly payments for the remaining months of the current OPP term. But in no case will any rate change cause the monthly rate during the OPP term to exceed that in effect at the beginning of the customer's OPP term.

LT-3 OPP Entrance Facilities with an Optical Interface are composed of two rate elements, LT-3 Service Packages (SP) and LT-3 Service Channels (SC) as described in 6.8.2(D)(6)(f) following. LT-1 and LT-3 Switched Transport Service rates and charges for which the OPP is available are listed in 6.9.1 and 6.9.6 following.

C

Customers subscribing to the OPP will be subject to nonrecurring charges as specified in 6.9.6(B) for installation and rearrangements of services covered by the plan. The nonrecurring charges will not be spread over the OPP term. If the customer subscribes to the OPP on an existing service with no other changes, no nonrecurring charges will apply.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.2 Description and Application of Rates and Charges (Cont'd)

(D) Application of Rates (Cont'd)

(6) Optional Payment Plan (OPP) for LT-1 and LT-3 Switched Transport Services (Cont'd)

(a) General (Cont'd)

At the expiration of the OPP term and if the customer wishes to continue LT-1 or LT-3 Service, the customer may select a new OPP at the prevailing OPP rate. If a customer does not wish to renew the OPP at the expiration of the term, the customer's service will automatically convert to the month-to-month or LT-3 Monthly Extension rates.

(b) Prepayment of an OPP

A customer may, at any time during an OPP term, elect to prepay the remaining monthly charges for the rest of the term. The prepayment amount will be adjusted for the time value of money. Recurring charges will cease for the rest of the term and start up again at the end of the OPP if service has not been disconnected. If prepayment has been elected and the service is discontinued prior to the end of the OPP term, a credit for the unused portion of the OPP term, adjusted for the time value or money, will be given to the customer. Termination charges will still be applicable. Once a customer selects the prepayment option, the prepaid amount is not adjusted for company initiated rate changes that occur during the period for which the customer has prepaid.

(D) Application of Rates (Cont'd)

(6) Optional Payment Plan (OPP) for LT-1 and LT-3 Switched Transport Services (Cont'd)

(c) OPP Termination Liabilities

Customers requesting termination of service prior to the expiration date of the OPP term will be liable for a termination charge. The termination charge for all OPP terms subscribed to prior to February 20, 1997, except for LT-3 Service Packages, will be calculated as follows:

The dollar difference between the current OPP rate for the OPP term that could have been completed during the time the service was actually in service, or the monthly rate for services in place less than 12 months, and the customer's current OPP rate for each month the service was provided.

For example, a customer subscribed to a 60 month OPP term and disconnected service during the 37th month. This customer's termination charge would be:

$[36 \text{ month OPP Rate} - 60 \text{ month OPP rate}] \times 37 = \text{Termination Charge.}$

The 36 month OPP term could have been completed during the months the service was actually in service.

(e) Moves (cont'd)

(ii) LT-3 Service

During an OPP term, a customer may move one end of an LT-3 Service to another location within the same LATA without incurring termination charges, as described in (c) preceding, provided the following conditions are met:

- The LT-3 Service has satisfied the twelve month minimum service period requirement at the old location,
- For LT-3 Service Channels with an Optical Interface, the number of LT-3 Service Channels with an Optical Interface at the new location must be the same or greater than the number of LT-3 Service Channels with an Optical Interface being discontinued at the old location,
- the customer subscribes to a new OPP term at the new location that is equal to, or greater than the remaining period of the OPP term being discontinued at the old location and,
- no lapse in service occurs.

A new twelve month minimum service period requirement will apply to the LT3 Service at the new location. The monthly rates for the new service will be those rates in effect at the time the new service is installed.

(D) Application of Rates (cont'd)

(6) Optional Payment Plan (OPP) for LT-1 and LT-3 Switched Transport Services (cont'd)

(f) LT-3

LT-3 Entrance Facilities with an Optical Interface are composed of two rate elements; LT-3 Service Packages (SP) and LT-3 Service Channels (SC). Each LT-3 Service Package provides the capability to provision a maximum number of LT-3 (44.736 Mbps) channels. The LT-3 Service Channels (SC) are the individually activated 44.736 Mbps channels. Each LT-3 Service Package with an Optical Interface must have a minimum number of service channels activated at all times. A new LT-3 Service Package with an Optical Interface must be installed with at least the minimum required Service Channels. A customer may not disconnect Service Channels from an existing LT-3 Service Package with an Optical Interface below the minimum required in that package without downgrading the Service Package size or terminating the LT-3 Entrance Facility Service.

C

C
 C

C

C

D

D

LT-3 Service Packages with an Optical interface provide a single optical interface for multiple LT-3 SCs and are available as follows.

C

LT-3 Service Package With Optical Interface	Minimum Required SCs	Maximum Number of LT-3 Equivalent SCs in Package
DS3012	7	12
DS3024	13	24

T

(TR1214)

6.8.2 Description and Application of Rates and Charges (cont'd)

(D) Application of Rates (cont'd)

(6) Optional Payment Plan (OPP) for LT-1 and LT-3 Switched Transport Services (cont'd)

(f) LT-3 (cont'd)

T

All LT-3 Service Channels with an Optical Interface within the package must be ordered for termination at the same customer designated premises, billed to the same customer and in the same Serving Wire Center (SWC). Separate LT-3 Service Packages with an Optical Interface must be ordered if provisioned by means of a Local Channel Diversity or a Serving Wire Center Avoidance Special Facilities Routing Arrangement as specified in 11.2.1 following. All Service Channels in a package are required to be connected to other service components (i.e., Direct Transport, Channel Mileage or Multiplexing), at the time the Service Channel is installed.

C

C

The Interconnection of individual Service Channels with other components, such as Direct Transport Channel Mileage and Multiplexing, may be different. For example, one Service Channel within the package may have Multiplexing, while another Service Channel may have Direct Transport Channel Mileage associated with it. Components connected to each Service Channel in the service package may have different Optional Payment Plan periods from the service package in which the Service Channels reside.

During a customer's OPP term, conversion may be made from one LT-3 Service Package with an Optical Interface to another larger package (e.g., DS3012 to DS3024) for a new OPP term of the same or different length. If the expiration date of the new OPP term is beyond the end of the original OPP term, termination charges will not apply to the original OPP term.

C

C

Monthly Extension rates for LT-3 Service will apply only after a customer has completed an OPP term.

(D) Application of Rates (Cont'd)

(6) Optional Payment Plan (OPP) for LT-1 and LT-3 Switched Transport Services (Cont'd)

(g) Volume Pricing Plan for LT-3 Entrance Facilities with an Electrical Interface

(1) General

The Volume Pricing Plan (VPP) will be grandfathered as of January 11, 2002. Customers with OPPs on order or in effect prior to Jan 11, 2002, will continue to receive the VPP until the expiration of their OPP term. The VPP will not be available with OPPs that are ordered on or after January 11, 2002.

(N)
 |
 (N)

The Volume Pricing Plan (VPP) for LT-3 Entrance Facilities (EF) with an Electrical Interface (EI) provides rate discounts to customers based on the number of LT-3 Entrance Facilities with an EI provided to the customer's designated premises and the Optional Payment Plan term selected by the customer.

The following volume discounts, shown in terms of percentage discounts, will be applied to LT-3 Entrance Facility with an electrical Interface rates as specified in 6.9.6(A)(1) following. The volume discount will be based on the OPP term selected by the customer and the number of LT-3 Entrance Facilities with an Electrical Interface provided to the same customer designated premises and will be provided as a credit on the customers monthly bill.

Volume Discount Band	LT-3 EF Quantity	Volume Discount Percentage Optional Payment Plan Term		
		12 Month	36 Month	60 Month
A	2	19.5%	2.4%	2.3%
B	3 to 5	23.6%	5.8%	5.5%
C	6 to 11	30.6%	8.5%	12.6%
D	12 to 23	41.8%	25.2%	25.2%
E	24 or more	52.4%	38.0%	33.8%

(6) Optional Payment Plan (OPP) for LT-1 and LT-3 Switched Transport Services (Cont'd)

(g) Volume Pricing Plan for LT-3 Entrance Facilities with an Electrical Interface (Cont'd)

(x)

(1) General (Cont'd)

At the end of each monthly billing period, billing for LT-3 Entrance Facilities with an EI that are provided under an OPP term will be adjusted via a billing credit. The monthly credit will be developed by determining the number of LT-3 Entrance Facilities with an EI provided to the customer's designated premises, along with their associated OPP payment term, in service at the end of the monthly billing period. The preceding discount percentages will be applied to all of the customer's LT-3 Entrance Facilities with a EI that are provided under the same OPP term, and billed to the same customer billing account and will be provided as a credit to the customer's monthly LT-3 billing.

(2) Regulations

All of the customers in service LT-3 Entrance Facilities with an EI provided under an OPP term, (both interstate access and intrastate access), along with all of the customer's DS3 Local Distribution Channels with an EI provided under an OPP term, as described in Section 7.4.10 I following, will be used to determine the Volume Discount Band applicable for that monthly billing period.

When a customer has LT-3 Entrance Facilities with an EI provided under different OPP payment terms, each OPP payment term will be administered separately and a Volume Discount Band will be determined for each OPP term based on the customers in service quantities for that term.

When there is more than one LT-3 Entrance Facility termination location at the customer designated premises, each location will be administered separately and a Volume Discount Band(s) will be determined based on the LT-3 Entrance Facility OPP term(s) at that location.

(x)

(3) Conversion of LT-3 Service Package and Service Channels in service prior to October 15, 1999. (Cont'd)

(i) Conversion Credit for Converted LT-3 Service Packages

When a converted LT-3 Entrance Facility rate under the VPP is higher than its equivalent rate under the discontinued Service Package structure, the customer will be given a one time credit, as shown following, based on the difference between what the customer would have paid under the Service Package structure and what the customer will pay under the VPP. The credit will be equal to the difference between the monthly rate for the Service Package, with activated LT-3s, and the VPP rate for the same number of LT-3s, times the number of months remaining in the customer's OPP term

For example: assume that 10 converted LT-3s were part of a former DS3L Service Package with 10 LT-3s activated and the Service Package was located in a rate zone 3 wire center under a 60 month OPP term with six months remaining on the OPP term. The LT-3 conversion Credit will be calculated as follows:

\$415.42 (LT-3 conversion credit for a rate zone 3 DS3L Service Package with 10 activated LT-3s provided under a 60 month OPP term) X 6 (months remaining on the OPP term) = \$2,492.52 (Conversion Credit)

(x)

(x)

x Issued under authority of Special Permission No. 01-068 of the FCC to withdraw without becoming effective tariff revisions originally filed under Transmittal No. 1273 and restores material as it existed prior to filing Transmittal No. 1273.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.2 Description and Application of Rates and Charges (Cont'd)

(D) Application of Rates (Cont'd)

(6) Optional Payment Plan (OPP) for LT-1 and LT-3 Switched Transport Services (Cont'd)

(g) Volume Pricing Plan for LT-3 Entrance Facilities with an Electrical Interface (Cont'd)

(x)

(3) Conversion of LT-3 Service Package and Service Channels in service prior to October 15, 1999. (Cont'd)

(i) Conversion Credit for Converted LT-3 Service Packages

Any customer terminating a LT-3 Entrance Facility that was provided a Conversion Credit before the expiration of the OPP term under which it was converted shall be liable for a Conversion Credit termination charge. The Conversion Credit termination charge for each LT-3 Entrance Facility terminated shall be equal to the monthly LT-3 Conversion Credit originally provided to the customer, divided by the number of activated LT-3s in the original Service Package times the number of months remaining in the customer's OPP term.

For Example: Assume that 1 LT-3 Entrance Facility, which is part of a former DS3L Service Package with 10 activated LT-3s located in a rate zone 3 wire center under a 60 month OPP term, is discontinued 3 months before the expiration of its OPP term. The Conversion Credit termination charge will be calculated as follows:

\$415.42 (monthly conversion credit for a DS3L Service Package with 10 activated LT-3s in a rate zone 3 wire center under a 60 month OPP term) /10 (number of converted LT-3s) = \$41.54 (Conversion Credit for 1 LT-3) x 3 (number of months remaining in the customers 60 month OPP term = \$124.62 (Conversion Credit termination charge).

(ii) Termination Liability for Converted LT-3 Entrance Facilities

Customers requesting termination of converted LT-3 Entrance Facilities with an EI prior to the expiration date of the original OPP term may be liable for a termination charge. The termination charge for all OPP terms will be calculated as follows:

If the terminated LT-3 Entrance Facility was a former LT-3 Service Package with a capacity of one, the termination liability will be calculated as described in 6.8.2(D)(6)(c), preceding.

If the terminated LT-3 Entrance Facility was part of a former LT-3 Service Package with a capacity of more than one, and the terminated LT-3 Entrance Facility will not bring the total number of LT-3 Entrance Facilities remaining under the minimum required for the Service Package, as shown following, no termination liability will apply. If the terminated LT-3 Entrance Facility will bring the total number of LT-3 Entrance Facilities remaining under the minimum required for the Service Package, termination liability will be calculated as described in 6.8.2(D)(6)(c) preceding.

For example; if 4 LT-3s were part of a former DS3F Service Package and 1 of the LT-3s is terminated prior to the expiration date of the original Service Package OPP Term, no termination liability will apply. However, if an additional LT-3 is terminated prior to the expiration date of the original Service Package OPP Term, and the customer's total number of LT-3s, billed under the same OPP term falls below the minimum requirement for the former Service Package (i.e., less than 3 LT-3s for a DS3F Service Package) termination liability for the terminated LT-3 will be calculated as described in 6.8.2(D)(6)(c) preceding.

DS3L	7	12
DS3X	13	24

(7) Residual Rates

(a) The Residual Charge (RC) applies to all customers of interstate Switched Access Services.

The Residual Charge applies whenever Local Switching rates apply.

The Residual Charge applies to all switched access minutes of use switched at a Telephone Company end office. The application of the Residual Charge to calls or minutes that originate in an "open end" Switched Access Service (e.g., 800 service), is discussed in (c), following.

In addition, the Residual Charge applies on a per minute of use basis to Switched Access Services directly connected to a Cellular Carrier or RCC at an access tandem.

The Residual Charge will also apply for FGD Switched Access Service provided in conjunction with TRS Access, on a per minute of use basis.

(x)

(x)

x Issued under authority of Special Permission No. 01-068 of the FCC to withdraw without becoming effective tariff revisions originally filed under Transmittal No. 1273 and restores material as it existed prior to filing Transmittal No. 1273.

6.8 Rate Regulations (Cont'd)

6.8.2 Description and Application of Rates and Charges (Cont'd)

(D) Application of Rates (Cont'd)

(7) Residual Rates (Cont'd)

(b) Competitive Access Provider (CAP) Transport Residual Credit

The CAPTRC applies when the CAP provides transport from an Interexchange Carrier's (IC's) point of presence to the CAP's collocation arrangement at a wire center and the IC requests Direct Trunked Transport (DTT) to an end office within the same wire center building. When the CAP's customer requests Tandem Switched Transport to an access tandem, even if the access tandem is within the same wire center building, the CAPTRC does not apply. If the customer orders DTT to an end office not in the wire center building, the CAPTRC does not apply.

When a CAP purchases the transport between an IC location and the collocation arrangement from the Telephone Company, this is still Telephone Company provided transport. The CAPTRC does not apply with this arrangement.

The CAPTRC applies as a credit per minute of use for Switched Access Services connected to CAP-provided transport. The amount of the credit will not exceed the amount of the Residual Charge assessed.

The application of the CAPTRC to calls or minutes that originate in an "open end" Switched Access Service (e.g., 800 service), is discussed in (c).

6.8.2 Description and Application of Rates and Charges (cont'd)

(D) Application of Rates (cont'd)

(7) Residual Rates (cont'd)

(c) Determination for Originating and Terminating Charges for the Residual Charge and the CAP Transport Residual Credit

Terminating RC per minute charge(s) apply to:

- all terminating access minutes of use;
- all originating access minutes of use associated with FGA Access Services when the off-hook supervisory signaling is forwarded by the customer's equipment when the called party answers; and
- all originating access minutes of use associated with calls placed to 500, 700, 900 and toll free numbers, less those originating access minutes of use associated with calls placed to 500, 700, 900 and toll free numbers for which the customer furnishes for each month a report of either the number of calls or minutes or a Percent Common Line (PCL) report of the percent of calls or minutes that terminate in a Switched Access Service that is assessed Carrier Common Line charges.

C

If the customer does not provide a Percent Common Line report, the percent of calls or minutes that terminate to a common line will be assumed to be 100. When a customer provides a report, the percent will continue to be used until it is superseded by a subsequent report. When the customer determines that any currently effective PCL is no longer accurate, the customer shall report a revised percent. The revised PCL will become effective on the first day of the next monthly billing period which begins at least 15 business days after the day on which the customer reports the revised percent to the Telephone Company.

(D) Application of Rates (Cont'd)

(7) Residual Rates (Cont'd)

(c) Determination for Originating and Terminating Changes for the Residual Charge and the CAP Transport Residual Credit (Cont'd)

Originating RC charge(s) apply to:

- all originating access minutes of use;
- less those originating access minutes of use associated with FGA Access Services where the off-hook supervisory signaling is forwarded by the customer's equipment when the called party answers;
- less all originating access minutes of use associated with calls placed to 500, 700, 900 and toll free numbers;
- plus all originating access minutes of use associated with calls placed to 500, 700, 900 and toll free numbers for which the customer furnishes for each month a report of either the number of calls or minutes or a report of the percent of calls or minutes that terminate in a Switched Access Service that is assessed Carrier Common Line charges, and for which a corresponding reduction in the number of terminating access minutes of use has been made as set forth in (D) preceding.

(8) Trunk Ports

(a) Dedicated Tandem Trunk Port Rate

The Dedicated Tandem Trunk Port rate is assessed on all facilities terminating on a tandem trunk port on the serving wire center side of the access tandem. The rate is assessed for all Feature Group services on a per LT-1 basis. Each voice grade trunk terminating will be assessed 1/24th of the LT-1 rate. When Direct Transport is provided as an LT-3, LT-3 to LT-1 multiplexing is required.

(TR1135)

Issued: November 26, 1997

Effective: January 1, 1998

6.8.2 Description and Application of Rates and Charges (Cont'd)

(D) Application of Rates (Cont'd)

(8) Trunk Ports (Cont'd)

(b) End Office Common Trunk Port Rate

The End Office Common Trunk Port rate will apply to all originating and terminating minutes of use between the access tandem and the end office. This rate will also be assessed on FGA minutes of use terminating outside of the dial tone office, and all minutes of use originating or terminating at a RSS/RSM. The Common Trunk Port rate is assessed to all switched access minutes over Tandem Switched Transport Services, except where Tandem Switched Transport Services originate or terminate to a class 4/5 switch.

(C)
(C)
(C)

The common Trunk Port charge does not apply for Switched Access Services provided in conjunction with a cellular carrier or RCC which is directly connected at an access tandem.

(N)
(N)
(N)

(c) End Office Dedicated Trunk Port Rate

The End Office Dedicated Trunk Port rate is assessed on all direct-routed facilities between the serving wire center or the hub, and the end office terminating in an end office trunk port. The rate is assessed for all Feature Group services on a per LT-1 basis. Each voice grade trunk terminating will be assessed 1/24th of the LT-1 rate. When Direct Transport is provided as an LT-3, LT-3 to LT-1 multiplexing is required.

(9) Switched Transport Multiplexing

(a) Common Multiplexing

Common Multiplexing is assessed on a per minute basis at the access tandem for all switched access minutes that are transported over Tandem-Switched Transport between the end office and the access tandem. The Common Multiplexing Charge applies whenever the Tandem Switching rate applies, except when switched access is provided in conjunction with a cellular carrier or RCC, which is directly connected to an access tandem.

(11) Signaling System 7 (SS7) Signaling Charges

T

SS7 Signaling usage charges apply for the SS7 Signaling Option as follows:

(a) Signal Formulation

An Initial Address Message (IAM) Formulation usage charge will be assessed for each IAM message formulated at the Telephone Company End Office for originating FGD traffic and for each IAM message formulated for terminating FGB and FGD traffic that is tandem routed.

A Transaction Capabilities Application Part (TCAP) Signal Formulation usage charge will be assessed for each TCAP message that is formulated at the Telephone Company end office for the origination of non-call associated signaling messages (excluding LIDB and 800 Access Service).

(b) Signal Transport

An IAM Signal Transport usage charge will be assessed for each IAM message that is transported to the local Signal Transfer Point (STP) from the Telephone Company end office for direct routed originating FGD traffic. An IAM Signal Transport usage charge will also be assessed for each IAM message that is transported from the local STP to the end office for terminating FGB and FGD traffic that is direct routed to the end office.

T

(b) Signal Transport (Cont'd)

A TCAP Signal Transport usage charge will be assessed for each TCAP message that is transported to or from the local STP from the Telephone Company end office.

(c) Signal Switching

An IAM Signal Switching usage charge will be assessed for each IAM message that is switched by the local STP for direct routed originating FGD traffic and for each IAM message that is switched for direct routed terminating FGB and FGD traffic. A TCAP Signal Switching usage charge will be assessed for each TCAP message that is switched by the local STP for the origination or termination of non-call associated signaling messages (excluding LIDB and 800 Access Service).

(d) Signal Tandem Switching

An IAM Signal Tandem Switching usage charge will be assessed for an IAM message that is transported to and switched by the local STP for tandem routed originating FGD traffic and for an IAM message that is switched and transported to an end office for tandem routed terminating FGB and FGD traffic. When Signal Tandem Switching usage charges are assessed, Signal Switching and Signal Transport charges do not apply, except for SS7 Gateway Signaling as provided in Section 18.

Hoffman Estates, Illinois 60196-1025

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.4 Minimum Monthly Charge

Switched Access Service is subject to a minimum monthly charge. The minimum charge applies for the total capacity provided. The minimum monthly charge consists of the following elements:

The minimum monthly charge for the Local Switching and the Information Surcharge rate elements is the sum of the charges set forth in 6.9.2(A) and 6.9.7 following for the measured or assumed usage for the month.

For the Switched Transport rate element, the minimum monthly charge is assessed in terms of a Minimum Monthly Usage Charge (MMUC). If the actual Switched Transport usage charge for the month is higher than the MMUC, the customer pays the actual usage charge. If the Switched Transport usage charge is lower than the MMUC, the customer pays the MMUC. The MMUC is determined as set forth in 6.8.4 following. Rates for actual usage are set forth in 6.9.1(A) following.

The minimum monthly charge for chargeable optional features assessed on a per month basis is the monthly recurring rate.

Hoffman Estates, Illinois 60196-1025

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.5 Minimum Monthly Usage Charge (MMUC)

T

The MMUC billed to the customer for Switched Access Service ordered in BHMCs will be based on the total number of BHMCs (by type of BHMC) provided in or out of the end office (by type of service). For Switched Access Service ordered on a per line or trunk basis, the MMUC will be billed to the customer based on an assumed 30 BHMCs per line or trunk. For Feature Group A, the MMUC will be billed to the customer by entry switch.

The MMUC is not applied to Feature Group A services when an assumed average number of access minutes are used because actual measurement capabilities do not exist. In these cases, the customer will always be billed for the assumed average number of access minutes.

The MMUC (the minimum transport charge) does not apply at this time.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.6 Change of Feature Group Type

T

Changes from one type of Feature Group to another will be treated as a discontinuance of one type of service and a start of another. Nonrecurring charges will apply, with two exceptions.

(1) When a customer upgrades a Feature Group A or B service to a Feature Group D service, the nonrecurring charge will not apply if the following conditions are met:

(a) The same customer premises is maintained, and

(b) In case of conversion of an office to equal access:

- the customer submits a disconnect order for FGA or FGB within 30 days after the customer is notified by the Telephone Company as to the results of the final Presubscription allocation of end users to the customer. Further, the customer must request an effective date for the disconnect orders within 60 days after the Telephone Company has notified the customer of the results of the final Presubscription allocation, or

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.6 Change of Feature Group Type (Cont'd)

T

(1) (Cont'd)

(c) In the case of offices already converted to equal access:

- the orders for the disconnect of the FGA or FGB services and the start of FGD service are placed with the Telephone Company at the same time, and
- the customer requests the FGA or FGB service be disconnected no more than 90 days after the start of FGD service.

(2) When a FGC service is upgraded to a FGD service, the nonrecurring charge will not apply. Because FGC is no longer available in an end office once the end office is equipped with equal access capabilities, (i.e., FGD), such upgrades will be performed by the Telephone Company without the customer being required to place an order for the change.

When the effective dates for the disconnect and start of service are the same, minimum period obligations will not change, (i.e., the time elapsed in the existing minimum period obligations will be credited to the minimum period obligations of the FGD). When the effective dates for the disconnect and start of service are different, new minimum period obligations will be established for the FGD service. For all other changes from one type of Feature Group to another, new minimum period obligations will also be established.

6.8.7 Moves

T

A move involves a change in the physical location of one of the following:

- The point of termination at the customer's or the customer's end user premises
- The customer's premises

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

ACCESS SERVICE**6. Switched Access Service (Cont'd)****6.8 Rate Regulations (Cont'd)****6.8.7 Moves (Cont'd)****(A) Moves Within the Same Building**

When the move is to a new location within the same building, the Administrative Charge and the Customer Connection Charge for the service affected will apply. There will be no change in the minimum period requirements.

(B) Moves to a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new service. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

6.8.8 Measuring Access Minutes

Customer traffic to end offices will be measured (i.e., recorded or assumed) by the Telephone Company at end office switches or access tandem switches. Originating and terminating calls will be measured (i.e., recorded or assumed) by the Telephone Company to determine the basis for computing chargeable access minutes. In the event the customer message detail is not available because the Telephone Company lost or damaged tapes or experienced recording system outages, the Telephone Company will estimate the volume of lost customer access minutes of use based on previously known values.

For terminating calls over FGA, FGB, FGC and FGD, and for originating calls over FGA, FGB and FGD, 500 Access Service and 900 Access Service from equal access offices, the measured minutes are the chargeable access minutes. For originating calls over FGC, 500 Access Service and 900 Access Service from non-equal access offices, chargeable originating access minutes are derived from recorded minutes in the following manner.

- Step 1: Obtain recorded originating minutes and messages (measured as set forth in (C) following) from the appropriate recording data.
- Step 2: Obtain the total attempts by dividing the originating measured messages by the completion ratio. Completion ratios (CR) are obtained separately for the major call categories such as DDD, operator, 500, 700, 800, 900, Directory Assistance and International from a sample study which analyzes the ultimate completion status of the total attempts which receive acknowledgement from the customer.

y Material effective December 15 1994 under Transmittal No. 838.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.8 Measuring Access Minutes (Cont'd)

T

Step 2: (Cont'd)

That is, Measured Messages divided by Completion Ratio equals Total Attempts.

Step 3: Obtain the total non-conversation time additive (NCTA) by multiplying the total attempts (obtained in Step 2) by the NCTA per attempt ratio. The NCTA per attempt ratio is obtained from the sample study identified in Step 2 by measuring the nonconversation time associated with both completed and uncompleted attempts. The total NCTA is the time on a completed attempt from customer acknowledgement of receipt of call to called party answer (set up and ringing) plus the time on an uncompleted attempt from customer acknowledgement of call until the access tandem or end office receives a disconnect signal (ring - no answer, busy or network blockage). That is, Total Attempts times Non-Conversation Time per Attempt Ratio equals Total NCTA.

Step 4: Obtain total chargeable originating access minutes by adding the total NCTA (obtained in Step 3) to the recorded originating measured minutes (obtained in Step 1). That is, Measured Minutes plus NCTA equals Chargeable Originating Access Minutes.

Following is an example which illustrates how the chargeable originating access minutes are derived from the measured originating minutes using this formula.

- | | | | |
|--------|---|---|----------|
| Where: | Measured Minutes (M. Min.) | = | 7,000 |
| | Measured Messages (M. Mes.) | = | 1,000 |
| | Completion Ratio (CR) | = | .75 |
| | NCTA per Attempt | = | .4 |
| | | | |
| (1) | Total Attempts = 1,000(M. Mes) | = | 1,333.33 |
| | .75 (CR) | | |
| | | | |
| (2) | Total NCTA = .4 (NCTA per Attempt) x 1,333.33 | = | 533.33 |
| | | | |
| (3) | Total Chargeable Originating Access Minutes = | | |
| | 7,000 (M. Min) + 533.33(NCTA) | = | 7,533.33 |

When assumed minutes are used, the assumed minutes are the chargeable access minutes.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.8 Measuring Access Minutes (Cont'd)

FGA access minutes or fractions thereof, the exact value of the fraction being a function of the switch technology where the measurement is made, are accumulated over the billing period for each line or hunt group, and are then rounded up to the nearest access minute for each line or hunt group. FGB, FGC and FGD access minutes or fractions thereof, the exact value of the fraction being a function of the switch technology where the measurement is made, are accumulated over the billing period for each end office, and are then rounded up to the nearest access minute for each end office.

Assumed minutes are used for FGA services which originate or terminate in end offices not equipped with measurement capabilities or for originating FGA service equipped with the DID optional feature.

The assumed average access minutes for FGA services originating or terminating in end offices where measurement capability is not available or for originating FGA service equipped with the DID optional feature are as set forth following.

ACCESS SERVICE**6. Switched Access Service (Cont'd)****6.8 Rate Regulations (Cont'd)****6.8.8 Measuring Access Minutes (Cont'd)**

Where measurement capability exists for either originating or terminating usage, but not both, on a two-way FGA line, the billed usage shall be the following assumed minutes of use or the measured usage, whichever is greater:

	Minutes
State of Illinois	6,919
State of Indiana	3,383
State of Michigan	4,563
State of Ohio	1,849
State of Wisconsin	2,194

If the usage in the measured direction exceeds the foregoing assumed minutes of use, the assumed usage in the unmeasured direction will be zero minutes.

If the usage in the measured direction is less than the foregoing assumed minutes of use, the assumed usage in the unmeasured direction will be the foregoing assumed minutes minus the measured usage.

ACCESS SERVICE**6. Switched Access Service (Cont'd)****6.8 Rate Regulations (Cont'd)****6.8.8 Measuring Access Minutes (Cont'd)****(A) Feature Group A Usage Measurement**

For originating calls over FGA, usage measurement begins when the originating FGA entry switch receives an off-hook supervisory signal forwarded from the customer's point of termination. This off-hook signal is either provided by the customer's equipment or is forwarded by the customer's equipment when the called party answers.

The measurement of originating call usage over FGA ends when the originating FGA entry switch receives an on-hook supervisory signal from either the originating end user's end office, indicating the originating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

For terminating calls over FGA, usage measurement begins when the terminating FGA entry switch receives an off-hook supervisory signal from the terminating end user's end office, indicating the terminating end user has answered. The measurement of terminating call usage over FGA ends when the terminating FGA entry switch receives an on-hook supervisory signal from either the terminating end user's end office, indicating the terminating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

(B) Feature Group B Usage Measurement

For originating calls over FGB, usage measurement begins when the originating FGB entry switch receives answer supervision forwarded from the customer's point of termination, indicating the customer's equipment has answered.

The measurement of originating call usage over FGB ends when the originating FGB entry switch receives disconnect supervision from either the originating end user's end office, indicating the originating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

For terminating calls over FGB, usage measurement begins when the terminating FGB entry switch receives answer supervision from the terminating end user's end office, indicating the terminating end user has answered.

Issued: August 25, 1994**Effective: December 15, 1994**

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

T

(TR933)

Issued: December 8, 1995

Effective: January 12, 1996

Director, Federal Regulatory Planning & Policy, 4G62
2000 W. Ameritech Center Drive
Hoffman Estates, Illinois 60196-1025

ACCESS SERVICE**6. Switched Access Service (Cont'd)****6.8 Rate Regulations (Cont'd)****6.8.8 Measuring Access Minutes (Cont'd)****(B) Feature Group B Usage Measurement (Cont'd)**

The measurement of terminating call usage over FGB ends when the terminating FGB entry switch receives disconnect supervision from either the terminating end user's end office, indicating the terminating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

(C) Feature Group C Usage Measurement

For originating calls over FGC, usage measurement begins when the originating FGC entry switch receives answer supervision from the customer's point of termination, indicating the called party has answered.

The measurement of originating call usage over FGC ends when the originating FGC entry switch receives disconnect supervision from either the originating end user's end office, indicating the originating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

For terminating calls over FGC to services other than 500, 800, 900 or Directory Assistance, terminating FGC usage may not be directly measured at the terminating entry switch, but may be imputed from originating usage, excluding usage from calls to 500, 800, 900 or Directory Assistance Services. Actual measured usage will be used where available rather than an imputed value.

For terminating calls over FGC to 800 Service, usage measurement begins when the terminating FGC entry switch receives answer supervision from the terminating end user's end office, indicating the terminating 800 Service end user has answered.

The measurement of terminating call usage over FGC to 800 Service ends when the terminating FGC entry switch receives an on-hook supervisory signal from the terminating end user's end office, indicating the terminating 800 Service end user has disconnected, or from the customer's point of termination, whichever is recognized first by the entry switch.

ACCESS SERVICE**6. Switched Access Service (Cont'd)****6.8 Rate Regulations (Cont'd)****6.8.8 Measuring Access Minutes (Cont'd)****(D) Feature Group D Usage Measurement**

For originating calls over FGD with multifrequency signaling, usage measurement begins when the originating FGD entry switch receives the first wink supervisory signal forwarded from the customer's point of termination.

For originating calls over FGD with SS7 signaling, usage measurement for direct trunks begins when the FGD entry switch sends an Initial Address Message. If the IAM has to be resent, usage measurement will begin when the IAM is resent. Usage measurement for tandem trunks begins when the FGD entry switch receives an Exit Message.

The measurement of originating call usage over FGD with multifrequency signaling ends when the originating FGD entry switch receives disconnect supervision from either the originating end user's end office, indicating the originating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

The measurement of originating call usage over FGD with SS7 signaling ends when a Release Message is sent or received by the originating end user's end office, whichever occurs first.

For terminating calls over FGD, the measurement of access minutes begins when the terminating FGD entry switch receives answer supervision from the terminating end user's end office, indicating the terminating end user has answered.

The measurement of terminating call usage over FGD ends when the terminating FGD entry switch receives disconnect supervision from either the terminating end user's end office, indicating the terminating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

For purpose of assessing the Operator Transfer Service Charge as specified in 6.9.1(D)(1) following, a call is considered transferred when the Telephone Company operator activates the switch transferring the call to the designated customer and the call is received by that customer.

3-4	19
5-6	13
7-40	10
40-139	9
140-500	8
501 or greater	7

For Trunk Groups as Specified in 6.6.7(E) (2)

Trunk Group Size	Allowable Overflows Per Trunk Per Month
1-4	10
5-6	8
7-125	6
126 or greater	5

 Issued: August 25, 1994

Effective: December 15, 1994

ACCESS SERVICE**6. Switched Access Service (Cont'd)****6.8 Rate Regulations (Cont'd)****6.8.10 Application of Rates for Extension Service**

Feature Group A Switched Access Service is available with extensions, i.e., additional terminations of the service at different building(s) in the same or a different LATA. Feature Group A extensions in the same LATA and same state are charged for under the Telephone Company's local and/or general exchange service tariffs. Feature Group A extensions in different LATAs are provided and charged for as Special Access Service. The rate elements which apply are: A Direct Analog Service Local Distribution Channel, Channel Mileage Terminations and Channel Mileage, if applicable, and Signaling Capability, if applicable. All appropriate monthly rates and nonrecurring charges set forth in 7.5.3 following will set forth in 7.5.3 following will apply. Such extensions are ordered as set forth in 5.2 preceding.

6.8.11 Message Unit Credit

Calls from end users to the seven digit local telephone numbers associated with Feature Group A Switched Access Service are subject to Telephone Company local and/or general exchange service tariff charges (including message unit and toll charges as applicable). The monthly bills rendered to customers for their Feature Group A Switched Access Service will include a credit to reflect any message unit charges collected from their end users under the Telephone Company's local and/or general exchange service tariffs. The credit will apply for recorded originating usage or for assumed originating usage, as appropriate for the FGA service provided. When the credit is applied on assumed usage, such credit will not exceed the assumed levels of usage set forth in 6.8.7 preceding. No message unit credit will apply for any terminating FGA access minutes. The message unit credit for originating access minutes is as set forth in 6.9.5 following.

6.8.12 Local Information Delivery Services

Calls over Switched Access in the terminating direction to certain community information services will be rated under the applicable rates for Switched Access Service as set forth in 6.9 following. In addition, the charges per call as specified under the Telephone Company's local and/or general exchange service tariffs, e.g., 976 (DIAL-IT) Network Services, will also apply.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.13 Mileage Measurement

The mileage to be used to determine the Tandem-Switched Facility and Direct Transport Channel Mileage charges is calculated on the airline distance, as set forth in (A) through (M) following. The V&H coordinates method is used to determine the mileage. This method is set forth in the Exchange Carrier Association Tariff F.C.C. NO. 4 for Wire Center Information (V&H coordinates).

To determine the rate to be billed, first compute the mileage using the V&H coordinates method. If the calculation results in a fraction of a mile, always round up to the next whole mile. For Tandem-Switched Transport, multiply the rounded mileage by the Tandem-Switched Facility rate and the access minutes to be billed. If the Switched Transport is Direct Transport, then multiply the rounded mileage by the corresponding Direct Transport Channel Mileage rate. For Host-Remote Transport, multiply the rounded mileage by the Host-Remote Facility rate and the access minutes.

- (A) For Tandem-Switched Facilities ordered on a usage sensitive basis between the end office and the customer's serving wire center, mileage is measured between the end office where the call originates or terminates and the customer's serving wire center. This provision expires July 1, 1998, at which time mileage between the end office and the customer's serving wire center will be measured as described in (L) following.
- (B) When Direct Transport is ordered to the end office, Direct Transport Channel Mileage is measured on an airline distance basis between the end office and the customer's serving wire center.
- (C) Switched Transport for Feature Group A Switched Access Service is rated as Direct Transport between the customer's serving wire center and the FGA dial tone office. This Direct Transport Channel Mileage is calculated on an airline basis, between the customer's serving wire center and the FGA dial tone office, using the V&H coordinates method. For terminating FGA service, the Switched Transport between the FGA dial tone office and the terminating end office is rated as Tandem-Switched Transport. The Tandem-Switched Facility mileage is calculated using the V&H coordinates of the dial tone office and the terminating end office.

 Issued: November 26, 1997 Effective: January 1, 1998

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.13 Mileage Measurement (Cont'd)

- (D) When a non-AT&T customer's premises is within five miles of an AT&T Class 4 office, the Switched Transport mileage for a call which is carried over a Switched Access Service, originating or terminating through an end office switch, shall be the distance as would be determined from that end office switch to the service wire center for that AT&T Class 4 office unless the customer specifies that for an entire LATA, it wants all measurements determined from its serving wire center. This designation (i.e., which serving wire center to use in calculating mileage) may be changed only once in any 12 month period. Such change will be made without charge(s) to the customer
- (E) When the Alternate Traffic Routing optional feature is provided with Feature Groups B, C and D, to provide service from an end office to different customer premises locations, usage rated Switched Transport access minutes will be apportioned between the two transmission routes used to provide this feature. For terminating Feature Group B and for FGD routed via an access tandem such apportionment will be made using standard Telephone Company traffic engineering methodology and will be based on the last trunk CCS desired for the high usage group, as described in 6.3.1(A) preceding, and the relative capacity ordered to the end office, when the feature is provided at an end office switch, or to the subtending end offices when the feature is provided at an access tandem switch. For originating FGB and FGC, Switched Transport usage will be apportioned between direct routed and tandem routed using the Tandem Routed Percent factor as set forth in Section 6.7.5 preceding. For Feature Group D directly routed to an end office the apportionment will be based on the actual measured data which is recorded against the specific trunk group that carried a particular call. This apportionment will serve as the basis for the Switched Transport mileage calculation. The customer will be billed accordingly.
- (F) When terminating Feature Group B or C Switched Access Service is provided from multiple customer premises to an end office not equipped with measurement capabilities, the total Switched Transport access minutes for that end office will be apportioned among the trunk groups accessing the end office on the basis of the individual capacity, i.e., busy hour minutes or trunks ordered for each of those trunk groups. This apportionment will serve as the basis for the Switched Transport mileage calculation.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.13 Mileage Measurement (Cont'd)

- (H) Where measurement capability does not exist and/or end office specific usage data is not available, FGA terminating usage will be apportioned among the end offices in the access area of the entry switch to which the service is provided, as described following. (The access area is as defined in 6.8.1(D)(3)(b)(ii) preceding.) The usage to be apportioned will be the recorded usage or the assumed usage as set forth in 6.8.7 preceding.

Such apportionment will be based on the ratio of the number of subscriber lines served by each end office in the access area to the total number of subscriber lines in the access area. The ratio thus developed is applied to the total FGA terminating usage.

Tandem-Switched Facility mileage for the terminating FGA access minutes apportioned in this manner will be calculated on an airline basis, using the V&H coordinates method, between each end office to which minutes have been apportioned and the dial tone office.

- (I) When Feature Group B, C or D Switched Access is provided where the Switched Transport is provided by the Telephone Company and the end user connection is provided over public mobile service, mileage for access minutes will be calculated on the airline basis, using the V&H coordinate method, between the customer's serving wire center and the point of interconnection with the Cellular Carrier or Radio Common Carrier. The point of interconnection may be either an end office or an access tandem. C
- (J) When Feature Group D Switched Access is provided in conjunction with TRS Access Service, where the Switched Transport is provided from the Telephone Company's TRS Access Tandem to the serving wire center of the TRS subscriber's carrier of choice, the Switched Transport mileage will be calculated on an airline basis, using the V&H Coordinate method, between the central office containing the TRS Access Tandem and the serving wire center of the TRS subscriber's carrier of choice.
- (K) The mileage to be used to determine the monthly rate for TRS Channel Mileage is calculated on the airline distance between the serving wire center of the TRS Provider and the TRS Access Tandem where the service terminates.

The rate that is billed is calculated by first computing the mileage using the V&H Coordinate Method. Any fractional mileage is rounded up to the next whole mile. The mileage is then multiplied by the TRS Channel Mileage rate.

There is no mileage charge for TRS-PT facilities that have zero mileage.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.13 Mileage Measurement (Cont'd)

- (L) When a customer orders Direct Transport Services from its serving wire center to an access tandem in conjunction with Tandem-Switched Transport to the end office, the mileage used to determine the monthly rate for the Direct Transport Channel Mileage is calculated on the airline mileage basis, between the customer's serving wire center and the access tandem. The mileage to which the Tandem-Switched Facility rate applies is calculated between the access tandem and the end office. The V&H Coordinate Method is used to determine both mileage components.
- (M) When a customer orders Direct Transport Services between its serving wire center and a tandem or a hubbing location or between a hub and an end office, the mileage used to determine the monthly rate for the Direct Transport Channel Mileage is calculated on the airline mileage basis, between the customer's serving wire center and the access tandem or hub, or between the hub and the end office, respectively. The V&H Coordinate Method is used to determine the mileage for each of the service configurations.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.14 Shared and Mixed Use

Shared Use occurs when Switched Access Service and Special Access Service are provided over the same analog or digital high capacity facility or SONET based service through a common interface. The regulations governing the provision of Shared Use Facilities are set forth in 7.4.9 following. For Direct Transport using analog or digital high capacity facilities, monthly rates described in 6.9.6(A) apply on a prorated basis (e.g., 1/28th of LT-3 rates or 1/24th of LT-1 rates) for each channel of the high capacity facility that is used to provide Switched Access Service. While Shared Use of SONET facilities (i.e., OC-3, OC-12 and OC-48 Service, OC-3, OC-12 and OC-48 Dedicated Ring and SONET Xpress Service) for Switched Access Direct Transport is permitted, the SONET Special Access facilities continue to be rated as Special Access. Except for those nonrecurring charges waived under The Switched Optimization Plan as set forth in Section 6.8.2(C)(4), nonrecurring charges associated with Direct Transport will apply. The Residual Charge applies as described in 6.8.2(D)(7).

(T)
(T)

Mixed Use occurs on Switched Transport facilities when Direct Transport and Tandem-Switched Transport services are provided over the same analog or digital high capacity Direct Transport service through a common interface. Mixed use may only be provided where the end office and access tandem are collocated or the tandem location is also a hub.

The Switched Transport Mixed Use Facility will be ordered, provided and rated as Direct Transport Service (e.g., LT-3 Direct Transport Channel Mileage Terminations and Channel Mileage and Switched Transport Multiplexing). When the customer's serving wire center (SWC) is co-located with the end office, the Switched Transport Mixed Use Facility will be ordered, provided and rated as Entrance Facility only (i.e. Entrance Facility and Multiplexing). The nonrecurring charge that applies when the Switched Transport Mixed Use Facility is installed will be the nonrecurring charges associated with the installation of the appropriate Direct Transport LT-3 Direct Transport or LT-1 Direct Transport Service or Entrance Facility Service as set forth in Section 6.9.6 following.

Switched Access Service nonrecurring charges will apply to each Switched Access line or trunk activated on the Mixed Use Facility as specified in Section 6.8.1(C). The customer must place an order for each individual tandem-switched Switched Access Service or Direct Transport Service utilizing the Shared Use Facilities and specify the channel assignment for each such service.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.15 Information Surcharge

The Information Surcharge is a charge to recover costs that have been assigned to the interstate Information category through Parts 67 and 69 of the Commission's Rules. These costs are other than those incurred in the provision of interstate Directory Assistance Service as set forth in 9. following

M
|
M

The Information Surcharge is assessed to the customer based on the total number of access minutes. The rates are set forth in 6.9.7 following. The application of these rates with respect to the individual Feature Groups is as set forth in 6.8.1(D) preceding.

6.8.16 TRS Provider Transport (TRS-PT)

There are two types of rates and charges for TRS Provider Transport (TRS-PT). These are monthly recurring rates and nonrecurring charges, described as follows:

(A) Monthly Rates

The recurring rates for TRS-PT are flat rates that apply each month or fraction thereof that TRS-PT is provided. The recurring monthly rates that apply for TRS-PT are TRS Local Distribution Channel, TRS Channel Mileage and TRS Channel Mileage Termination. One TRS Local Distribution Channel rate is applied per TRS-PT entrance facility. One TRS Channel Mileage Termination rate is applied per end of the TRS-PT interoffice facility that terminates in the Telephone Company's serving area. TRS Channel Mileage is applied per mile of the TRS-PT interoffice facility.

Switched Access rates as set forth in Section 6.9 and Carrier Common Line rates as set forth in Section 3.9, will not apply to the Switched Access TRS traffic transported over TRS-PT facilities. Accordingly, the TRS-PT rates will not be ratcheted. Switched Access nonrecurring charges, as set forth in Section 6.9.3(A) following, will apply for each channel activated on a TRS-PT facility.

The monthly rates for TRS-PT are set forth in Section 6.9.5(A) following.

T

(B) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activities (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for TRS Provider Transport are: installation of service and service rearrangements.

(1) Installation of Service**(a) Administrative Charge**

The Administrative Charge applies any time a customer initiates an order for service. This charge applies once per customer order, as described in Section 5.1 preceding. Administrative Charges for TRS Provider Transport are set forth in Section 6.9.3(A) following.

(b) TRS Design and Central Office Connection Charge

The TRS Design and Central Office Connection Charge applies to each service installed, and is charged once per circuit. The nonrecurring charges for TRS Design and Central Office Connection are set forth in Section 6.9.5(B) following.

(c) TRS Customer Connection Charge

The TRS Customer Connection Charge applies to each service installed, and is charged once per TRS Provider Transport facility. The nonrecurring charges for TRS Customer Connection are set forth in Section 6.9.5(B) following.

(2) Service Rearrangements

Service Rearrangements are changes to existing (installed) services. Service Rearrangements for TRS Provider Transport will be treated as a disconnect and start of new service.

(N)

6.9 Rates and Charges (Cont'd)

6.9.6 Switched Transport Services (Cont'd)

(N)

(C) Optional Payment Plan Vintage Rates

(M)

1. General Regulations

Optional Payment Plan (OPP) vintage rates are those rates that apply to existing services provided under an OPP term in the event the Telephone Company initiates a rate increase. Vintage rates as set forth following are classified as vintage because the Telephone Company ensures that rates provided under an OPP term will not be increased by the Telephone Company above the OPP rate in effect at the beginning of the customer's OPP term. Each Telephone Company Wire Center has been assigned to a rate zone. To determine the rate zone wire center assignment use the following:

(M)
(N)

- For OPP terms in effect prior to November 18, 2000, wire center rate zone assignments can be found in Section 7.7 following,
- For OPP terms in effect on or after November 18, 2000, wire center rate zone assignments can be found in the National Exchange Carrier Association, Inc. (NECA) F.C.C. Tariff No. 4.

(N)

Customers, under their current OPP term, will continue to pay the rates as shown in Section 6.9.6(C)(2) until such time as:

(C)

- the effective tariff rate in Section 6.9.6(A) becomes lower than the vintage rate,
- the assignment of a new rate zone involves a lower rate,
- the customer's existing OPP term expires, or
- the service is terminated by the customer.

In addition, customer modifications, other than termination, that cause a new rate or OPP term to be established will result in the service becoming non-vintage and the rates as specified in Section 6.9.6(A) will apply.
