ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.3 Frame Relay Service8.3.1 Description

Frame Relay Service (FRS) is a fast packet network that provides the customer high speed access and throughput to different customer addresses. Utilizing statistical multiplexing, the frame relay network enables the customer to allocate circuit bandwidth to applications as needed, rather than assigning fixed channels to specific applications.

Permanent Virtual Connections (PVCs) are logical channels that connect ports on a frame relay switch or between frame relay switches. PVCs are end-to-end, bi-directional channels that are established and disestablished via the service order process. A separate PVC must be established to each location that the customer desires to transmit data. These PVC channels are virtual because they are established in software tables and do not tie up facilities when not in use. Multiple PVCs can be defined over a single Frame Relay Access Link, thereby providing a single access line the capability to transmit data to multiple destinations.

Physical access to the Telephone Company's frame relay network is provided via a special access channel termination or an electrical cross-connect used in conjunction with expanded interconnection. Special access channel terminations must be ordered in accordance with the provisions set forth in Section 7, preceding. Electrical cross-connects must be ordered in accordance with the provisions set forth in Section 17, following. Customers who purchase FRS must also ensure that the special access facilities ordered from the Telephone Company are equipped with Bipolar with 8 Zero Substitution (B8ZS) line code, as well as Extended Super Frame (ESF) capability for DS1 facilities. The Telephone Company will provision FRS to support industry standards for the User to Network Interface (UNI) and the Network to Network Interface (NNI).

FRS is offered where facilities exist. If it is necessary to construct facilities to satisfy service requests, the service may be provided pursuant to the Telephone Company's Special Construction provisions set forth in Section 14 following.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.3 Frame Relay Service (Cont'd)8.3.2 Service Components(A) Access to the Frame Relay Network

Special access channel terminations or electrical cross-connects are used to connect the customer premises to the FRS UNI or NNI Port Connection. Special access channel terminations are provided under Section 7 preceding, and are available at speeds of 56.0/64.0 kbps through 1.544 Mbps for the UNI Port Connection and at 1.544 Mbps and 44.736 Mbps for the NNI Port Connection. Electrical cross-connects are provided under Section 17, following, and are available at 1.544 Mbps for the UNI Port Connection and 1.544 Mbps and 44.736 Mbps for the NNI Port Connection.

(B) User to Network Interface (UNI) Port Connection

The User to Network Interface (UNI) Port Connection is a standard interface used to connect the end user to the Telephone Company's frame relay network. It receives the data frame from the customer's network or CPE devices and verifies that the customer address destination is valid before relaying the frame. The UNI Port Connection is available at 56.0/64.0 kbps through 1.544 Mbps. The transmission speed of the UNI Port Connection may not exceed the transmission speed of the special access channel termination or electrical cross-connect. One special access channel termination or electrical cross-connect is required per UNI Port Connection.

(C) Network to Network Interface (NNI) Port Connection

The Network to Network Interface (NNI) Port Connection provides bi-directional polling between the Telephone Company's FRS switch and the interexchange carrier's or other customer's frame relay network.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.3 Frame Relay Service (Cont'd)8.3.2 Service Components (Cont'd)(C) Network to Network Interface (NNI) Port Connection (Cont'd)

The NNI Port Connection is available at speeds of 1.544 Mbps and 44.736 Mbps. The NNI Port Connection must be provided at the same transmission speed as the special access channel termination or electrical cross-connect. One special access channel termination or electrical cross-connect is required per NNI Port Connection

(D) Permanent Virtual Circuits (PVCs)

The PVC provides a software defined electronic path between two port connections within the frame relay network. A UNI or NNI Port Connection can be associated with any number of PVCs. Since all PVCs need not be in use at the same time, it is possible for the total bandwidth of all PVCs associated with one Port Connection to exceed the bandwidth of the Port Connection. It is not possible, however, for the simultaneous aggregate of the PVC's throughput to exceed the bandwidth of the Port Connection. Such a relationship is referred to as over-subscription or overbooking, and when this occurs, there can be no guarantee that the bandwidth defined for that PVC will be available at any point in time.

(E) Committed Information Rate (CIR)

CIR defines the amount of data throughput on a designated PVC that the Telephone Company will support under normal operating conditions. Any data burst beyond the CIR may be labeled Discard Eligible (DE) if the data transfer rate exceeds the CIR of the PVC being used. If the frame relay network develops congestion, the frames marked DE may be discarded.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)

8.3 Frame Relay Service (Cont'd)

8.3.3 Rates Regulations

The minimum service period for Frame Relay Service is one month.

When the customer orders additional PVCs with a designated CIR, the CIR nonrecurring charge shall apply. When a change is made to a customer's frame relay configuration at the customer's request, the administrative nonrecurring charge shall apply. Such changes are defined as those rearrangements necessary to add, delete, or rearrange the customer's configuration, including changes to CIRs. Although multiple changes may be caused by such actions, only one administrative charge will apply.

When the customer changes the CIR on an existing PVC, the CIR nonrecurring charge will apply in addition to the administrative nonrecurring charge.

8.3.4 FRS Term Discount Plans

(A) General

Frame Relay Service Term Discount Plans (FRSTDPs) are available for UNI port connections at the speeds of 56.0/64.0 kbps through 1.544 Mbps and for 1.544 Mbps and 44.736 Mbps NNI port connections. A FRSTDP provides the customer with discounted rates for the services listed. The customer agrees to a minimum service commitment per service on a state or national basis when the TDP is established.

Both the UNI and NNI port connections for a given circuit must be ordered for the same commitment period with the same service date for the same customer. A customer establishes a FRSTDP by selecting all or a portion of their in-service port connections and committing those port connections to a minimum term of 3 years up to a maximum term of 5 years. Customers may disconnect or move port connections within the committed area (i.e., state or nation) and not be subject to termination liability charges as long as the commitment levels are maintained.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)

8.3 Frame Relay Service (Cont'd)

8.3.4 FRS Term Discount Plans (Cont'd)

(B) Ordering Provisions

The customer must order a FRSTDP in writing to the Telephone Company. A FRSTDP may be ordered based on the following plan options.

- 3 Years
- 5 Years

(D)
(D)

(D)
—
(D)

The customer must specify the plan and the length of the service commitment period. Once the plan is established, and commitment periods are agreed upon, standard access ordering procedures will be followed.

When a customer converts to a FRSTDP, no access order charges are applied toward facilities in-service at that time. If a customer moves from a month to month plan to a FRSTDP, or upgrades from one FRSTDP to another, no access order charges are applied.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.3 Frame Relay Service (Cont'd)8.3.4 FRS Term Discount Plans (Cont'd)(C) Service Rearrangements

When a UNI or NNI port connection committed to a FRSTDTP is rearranged, a charge equal to one half the UNI or NNI port connection nonrecurring charge associated with the month-to-month rates for that service will apply. Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements as set forth in 5.2.6(E) preceding or a change in the physical location of the point of termination at the customer designated premises. Changes in the physical location of the point of termination are treated as disconnects and starts, and will be assessed the nonrecurring charge associated with the month-to-month rates for that service.

(D) Termination Liabilities

If a customer disconnects any portion of their FRSTDTP service prior to the expiration of the commitment period, the customer will be billed 50% of the monthly FRSTDTP charges for the remaining portion of the committed term. For example, a customer disconnecting in the 12th month of a 3 year plan will be charged 50% of the remaining 24 months of billing.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.3 Frame Relay Service (Cont'd)8.3.4 FRS Term Discount Plans (Cont'd)(E) Rate Changes

In this section, the term "rate" refers to the charges associated with the entire circuit covered by a FRSTDP. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the FRSTDP. If a Telephone Company initiated rate increase causes a customer's rates to increase by 10% or more at any one time, the customer may cancel the FRSTDP without incurring termination liability charges.

(F) Extension of a FRSTDP Commitment Period

FRSTDP commitment periods can be extended by the customer at any time during the term of the plan, up to a maximum of 5 years. The number of months accrued in the current plan will apply toward the new plan selected. For example, a customer having completed 15 months of a 3 year commitment can extend the commitment to 5 years and no additional charges will be assessed. The first payment will be considered the 16th payment under the new 5 year Plan.

(G) Renewal of a FRSTDP

At the end of the FRSTDP service commitment period, the customer may subscribe to a new FRSTDP at the prevailing rates set forth in Section 8.3.5 following. If the customer does not select a new FRSTDP, the rates will convert to the prevailing month-to-month UNI and NNI rates set forth in Section 8.3.5 following. The customer will have a 90 day grace period to renew their FRSTDP before month-to-month rates will be assessed.

(H) Cancellation Charges

When a customer cancels an order for frame relay services being provided under a TDP, cancellation charges, as set forth in 5.2.4 preceding, will be calculated using the nonrecurring charges associated with the month-to-month rates for the service being cancelled.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.4 Wide Area Data Network Service8.4.1 Service Description

Wide Area Data Network (WADN) Service is a router-based data network service provisioned over Telephone Company provided facilities. WADN Service provides customers with local area network (LAN) to LAN, workstation to LAN, and LAN to workstation connectivity. WADN Service is provided on a dedicated basis at port speeds of 56.0 kbps, 128.0 kbps, and 1.544 Mbps.

WADN Service is offered where facilities exist. In situations where the Telephone Company must construct facilities to satisfy customer requests, WADN Service may be provided in accordance with the special construction provisions set forth in Section 14 following. If the customer is located in an area outside of the WADN, special access rates as set forth in Section 7 preceding will apply to dedicated facilities provided for customer connection to the WADN.

8.4.2 Rate Regulations

The minimum service period for WADN Service is three months.

When ordering WADN Service, the customer must specify all locations within the WADN which will be accessed for data transactions. The Dedicated Network Access Charge is applicable for each location connected to the WADN.

The administrative charge applies to each request received from a customer to add, change, delete, or otherwise modify the customer's routing patterns within the WADN.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.5 Digital Subscriber Line Technology8.5.1 General Description(A) Basic Digital Subscriber Line (DSL) Description

DSL is an access data technology offered in speed levels of: 1) up to 512 Kbps down/up to 128 Kbps up; 2) up to 1.5 Mbps down/up to 384 Kbps up; 3) up to 640 Kbps down/up to 640 Kbps up; 4) up to 3.0 Mbps down/up to 512 Kbps up; 5) up to 1.5 Mbps down/up to 256 Kbps up; 6) up to 256 Kbps down/up to 96 Kbps up and 7) up to 3.0 Mbps down/up to 384 Kbps up. The "up" speeds represent transmission speeds in kilobits per second (Kbps), from the point of demarcation at the customer designated premises to the Telephone Company's DSL connection point; while the "down" speeds represent transmission speeds in Kbps or megabits per second (Mbps), from the Telephone Company's DSL connection point to the point of demarcation at the customer's designated premises. Actual speeds may be affected by loop distance and other factors.

(C)
(C)

The DSL technology may require a splitter at both the customer's designated premises and the Telephone Company's serving wire center to split the traffic between data and voice. The customer is responsible for providing and maintaining the splitter at the customer's designated premises. The voice traffic will be routed to the serving wire center switching equipment while the data traffic will be directed through a multiplexer for connection to the Telephone Company's network.

(B) DSL Provisioning

DSL technology provides a virtual private line connection from the customer's designated premises to the point of connection on the Telephone Company's network. Access from the Telephone Company's DSL connection point will be provided where facilities and equipment exist.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.5 Digital Subscriber Line Technology (Cont'd)8.5.1 General Description (Cont'd)(B) DSL Provisioning (Cont'd)

The Telephone Company will qualify the local exchange service loop between the customer's designated premises and the serving wire center. The purpose of qualification is to determine the availability and suitability of existing Telephone Company facilities to provide the technology, and to determine if loop conditioning is required to support DSL. The Telephone Company will not provision this technology on facilities which are not suitable for DSL.

The Telephone Company does not undertake to originate data, but offers the use of its DSL technology, where available, to customers for the purpose of transporting data originated by the customer or a third party.

All customers will be served from the nearest suitably equipped end office. Information pertaining to end offices equipped to provide DSL technology is set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. DSL will be provided subject to the availability and limitations of the Telephone Company wire centers and outside plant facilities. DSL technology is only available where technical capabilities permit such facility distance and type of physical plant.

(C) Responsibility of the Telephone Company

The Telephone Company will provision and maintain DSL technology for the customer up to and including the splitter and Network Interface Device. The Telephone Company will advise the

customer of the customer premises equipment necessary to support DSL technology that the customer will need to purchase.

(D) Rights of the Telephone Company

The Telephone Company will not provision DSL if it has reasonably determined that: a) it is not technically feasible over existing facilities; or b) it will cause interference problems within the Telephone Company's network or other facilities.

During the Telephone Company's network maintenance and software update period, it may be necessary to temporarily place the DSL central office equipment out of service. The Telephone Company also reserves the right to temporarily interrupt the DSL technology at other times in emergency situations.

(E) Responsibility of the Customer

The customer is responsible for providing compatible customer premises equipment that is used for connection to DSL technology.

The customer is responsible for providing the Telephone Company with the necessary information (e.g., data link connection identifier(s), and/or internet protocol) to provision the DSL technology.

The customer ordering DSL technology on behalf of its subscriber(s) must obtain a letter of agency.

8. Specialized Network Services (Cont'd)

8.5 Digital Subscriber Line Technology (Cont'd)

8.5.2 Rate Regulations

(A) DSL Arrangements

- (1) DSL arrangements are available in seven options and are based on the “downstream” and “upstream” speed combinations chosen by the customer. These options are listed below: (C)

	<u>Downstream Speed</u>	<u>Upstream Speed</u>	
Option I	up to 512 Kbps	up to 128 Kbps	
Option II	up to 1.5 Mbps	up to 384 Kbps	
Option III	up to 640 Kbps	up to 640 Kbps	
Option IV	up to 3.0 Mbps	up to 512 Kbps	
Option V	up to 1.5 Mbps	up to 256 Kbps	
Option VI	up to 256 Kbps	up to 96 Kbps	
Option VII	up to 3.0 Mbps	up to 384 Kbps	(N)

A nonrecurring charge and a monthly recurring rate will apply per DSL arrangement as set forth in 8.5.3 following.

- (2) Line conditioning is available, at no charge, and may be required if the facility will not accommodate DSL technology. This may include, but is not limited to, the removal of load coils, bridge taps and/or repeaters. The Telephone Company does not warrant that line conditioning will permit the provision of DSL technology.

ISSUE DATE:

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.5 Digital Subscriber Line Technology (Cont'd)8.5.2 Rate Regulations (Cont'd)(A) DSL Arrangements (Cont'd)(3) Temporary Suspension of Service

When the local exchange service line over which a DSL arrangement is provided is temporarily suspended (e.g., vacation service), the customer may request that the associated DSL service be suspended for the same period of time as the local exchange service line.

Temporary suspension of service is available to customers subscribing to the following month-to-month and DSL term discount plan (DSL-TDP) arrangements:

Option I	512 Kbps/128 Kbps
Option II	1.5 Mbps/384 Kbps
Option III	640 Kbps/640 Kbps
Option IV	3.0 Mbps/512 Kbps
Option V	1.5 Mbps/256 Kbps
Option VI	256 Kbps/96 Kbps
Option VII	3.0 Mbps/384 Kbps

(N)

DSL arrangements provided on a wholesale basis under the volume and term discount plans described in (C) following are not eligible for temporary suspension of service.

During the period of suspension, Telephone Company network facilities will remain assigned to the customer, however, the port in the DSLAM will be disabled.

The rates applicable during the period of suspension for month-to-month and DSL-TDP arrangements are set forth in 8.5.3 following.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.5 Digital Subscriber Line Technology (Cont'd)8.5.2 Rate Regulations (Cont'd)(B) DSL Term Discount Plan (DSL-TDP)(1) General Description

The DSL-TDP provides the DSL customer with rate stabilization and discounted rates based upon the term commitment selected by the customer.

Term commitments of one, two, three, four and five years are available. Rates and charges for DSL-TDP are set forth in 8.5.3 following.

Rate decreases will automatically be applied to the monthly recurring rates for the remainder of the service period. Additionally, customers may discontinue DSL-TDP, without penalty, should the monthly recurring rates increase by 10% or more at any one time.

(2) Nonrecurring Charges

A nonrecurring charge will apply for those arrangements ordered under a DSL-TDP as set forth in 8.5.3 following.

ISSUE DATE:

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.5 Digital Subscriber Line Technology (Cont'd)8.5.2 Rate Regulations (Cont'd)(B) DSL Term Discount Plan (DSL-TDP) (Cont'd)(3) Renegotiation

The customer may choose to terminate an existing DSL-TDP prior to the end of the term period and negotiate a new DSL-TDP without termination liability provided the new DSL-TDP meets the following requirements:

- the new DSL-TDP must represent a term commitment greater than or equal to the previous DSL-TDP, and
- the DSL speed option selected for the new DSL-TDP must be greater than or equal to the speed option of the previous DSL-TDP, and
- the new DSL-TDP must be based upon the rates that are currently in effect and available to all customers.

When the customer converts to a greater term commitment, actual time in service for the original DSL-TDP will be applied to the new DSL-TDP. However, no credits or refunds will apply for the billing of actual time in service for the previous DSL-TDP.

Certain material omitted from this page now appears on Original Page 8-35.1.

(N)

8.5 Digital Subscriber Line Technology (Cont'd)

8.5.2 Rate Regulations (Cont'd)

(B) DSL Term Discount Plan (DSL-TDP) (Cont'd)

(4) Downgrades

Certain DSL combinations ordered under a DSL-TDP may be downgraded to lower speed options:

(a) Option V (1.5 Mbps/256 Kbps) may be downgraded to Option I (512 Kbps/128 Kbps) or Option VI (256 Kbps/96 Kbps).

(b) Option I (512 Kbps/128 Kbps) may be downgraded to Option VI (256 Kbps/96 Kbps).

When a customer downgrades to a lower speed option, the new DSL-TDP will begin in month one. No credits or refunds will apply for the billing of actual time in service for the previous DSL-TDP.

A nonrecurring downgrade charge, as set forth in 8.5.3 following, will apply per service downgraded.

(5) Renewal

(N)

At expiration of the DSL-TDP, the customer may choose a new DSL-TDP, convert to the month-to-month rates, or continue with the rates, charges and terms and conditions in effect at the end of the expiring DSL-TDP on a year-to-year basis. A conversion to a new DSL-TDP or to month-to-month rates, or discontinuance, will require that the customer submit a service change order.

(6) Special Construction Charges

Any special construction charges incurred for services billed under a DSL-TDP will apply as specified in Section 14 following.

(7) Termination Liabilities

Customers who subscribe to a DSL-TDP prior to May 5, 2001 will pay termination liability charges as set forth in (a) or (b) following, whichever is less. For customers who subscribe to a DSL-TDP on or after May 5, 2001, a termination liability charge as set for in (b) following will apply.

- (a) If a customer disconnects any portion of their DSL-TDP prior to the end of month 12, the customer will be liable for 100% of the payments remaining for the first twelve months and 50% of the payments remaining for the rest of the term commitment. If the customer disconnects any portion of their DSL-TDP after the end of the 12th month, the customer will be liable for 50% of the payments remaining for the rest of the term commitment. For example, a customer disconnecting in the 10th month of a 3 year term commitment owes 100% of 2 payments and 50% of the 3 year term commitment for an additional 24 months. A customer disconnecting in the 18th month of 3 year term commitment owes 50% of the term payments for an additional 18 months.

8. Specialized Network Services (Cont'd)8.5 Digital Subscriber Line Technology (Cont'd)8.5.2 Rate Regulations (Cont'd)(C) Volume and Term Discount Plan (VTDP)(1) General Description

The DSL Volume and Term Discount Plan (VTDP) provides DSL customers discounted rates based on commitments of minimum volumes over a specific term. The VTDP encompasses all of a customer's DSL services for the same term.

A customer who purchases DSL under the VTDP assumes the following obligations:

- (1) the customer will submit orders to the Telephone Company for the customer's end user locations to receive DSL service;
- (2) the customer will provision all customer premises equipment and wiring to its end users;
- (3) the customer will deal directly with its end users and will be solely liable with respect to all matters relating to the service, including marketing, ordering, installation, maintenance, repair, billing and collections;
- (4) the customer will not direct its end users to contact the Telephone Company regarding any aspect of the service.

8.5 Digital Subscriber Line Technology (Cont'd)

8.5.2 Rate Regulations (Cont'd)

(C) Volume and Term Discount Plan (VTDP) (Cont'd)

(1) General Description (Cont'd)

The telecommunications services offered under the VTDP are provided on a wholesale basis to carriers and non-carriers. The telecommunications services offered under the VTDP are not services that the Telephone Company provides at retail and, accordingly, are not subject to the rate provisions of Sections 251(c)(4) and 252(d)(3) of the Communications Act, 47 U.S.C. §§251(c)(4), 252(d)(3).

When service is ordered under a VTDP, access to the Telephone Company's DSL connection point will be provided via Asynchronous Transfer Mode (ATM) service, where facilities and equipment exist. The rates and charges for ATM service are set forth in 8.6 following, and apply in addition to the rates and charges associated with the DSL VTDP.

VTDPs are available for terms of monthly, 1 year, 3 years, and 5 years, at the following commitment levels:

Level 1	1 - 2500	(C)(x)
Level 2	Over 2500	(C)(x)

Each commitment level has minimum line volumes assigned for each year of the VTDP. The commitment level includes all of a customer's in-service DSL lines in the Telephone Company's jurisdictions. The applicable VTDP rate is dependent upon the data access speed requested and the location where the service is provided. Commitment levels are selected by the customer and must be designated in the customer's order for VTDP. (C)(x)

(x) Customers subscribing to DSL Volume and Term Discount Plans (VTDP) established or on order prior to October 11, 2003 may elect to discontinue service without termination liability within 90 days of the effective date of the VTDP revisions filed under Transmittal No. 231.

(T)

(1) General Description (Cont'd)

The service year will begin on the service anniversary date, which is defined as the date on which the customer places its order for a VTDP and designates the commitment level and term. Each service year runs 12 months from its service anniversary date.

The commitment level must be reached in accordance with the following schedule:

<u>Term</u>	<u>Grace Period</u>
Monthly	end of month
1 year	6 months
3 years	12 months
5 years	24 months

At expiration of the VTDP, the customer may choose a new VTDP, convert to the month-to-month rates, or continue with the rates, charges, terms and conditions and commitment level in effect at the end of the expiring VTDP on a year-to-year basis. A conversion to a new VTDP or to month-to-month rates, or discontinuance, will require that the customer submit a service change order.

The minimum service period for DSL provided under a VTDP is one (1) month. If the DSL is disconnected prior to the end of the minimum service period, the customer will be assessed all applicable monthly recurring rates for the remainder of the minimum service period.

8.5.2 Rate Regulations (Cont'd)

(C) Volume and Term Discount Plan (VTDP) (Cont'd)

(1) General Description (Cont'd)

VTDP customers will be subject to shortfall liability charges for missed annual commitments and/or termination liability charges for early termination as set forth in (3) and (4) following.

(2) Annual Review

The commitment level is reviewed at the end of each service year on the service anniversary date. A count is taken of all DSL lines in service, in all Telephone Company jurisdictions covered by this tariff, as of the last day of the service year. Customers who do not meet the minimum quantity of in-service lines for their commitment level on such date will be notified by the Telephone Company.

The commitment levels will be reviewed after each grace period and monthly thereafter. If the commitment levels are not reached within the grace period, the customer shall be assessed a shortfall liability charge. In addition, customers with Commitment Level 2, with less than the minimum line volumes, will be reassigned to the lower commitment level until they achieve the required line commitment.

(C)(x)
| |
(C)(x)

At the end of any service year, a Level 1 customer may elect to move to the higher commitment level, either in an existing term VTDP or a longer term VTDP, for the next service year and for the remainder of the VTDP, if it has met the

minimum line volume for its existing commitment level. However, should the customer fail to meet the minimum line volume for the higher commitment level by the end of the service year following such election, an additional charge equal to 20% of the shortfall liability for the service year will be assessed as set forth in (3) following.

(3) Shortfall Liability

Shortfall liability applies to any VTDP customer with Commitment Level 2 that fails to meet the minimum line volumes for this commitment level.

(C)(x)
(C)(x)

Shortfall liability is based on the difference between the monthly rate for Commitment Level 2 and the monthly rate for Commitment Level 1. The shortfall liability is equal to the difference in monthly rate multiplied by the sum of all lines in service at the end of each month during such service period. For example, a customer subscribed to a 5-year VTDP with Commitment Level 2 that has only 800 lines in-service at the end of year 2 will be assessed the difference in the monthly rates between Commitment Level 2 and Commitment Level 1 for each line in service at the end of each month during the service year.

(T)

(3) Shortfall Liability (Cont'd)

An additional payment of 20% of the shortfall liability is assessed to those customers who fail to meet the minimum line volume.

(4) Termination Liability

A customer may terminate a VTDP without termination liability or shortfall liability charges if a Telephone Company initiated rate increase causes the customer's rates to increase by 10% or more at any one time during the term of the existing VTDP. Subsequent to a rate increase of 10% or more, customers must either elect to terminate the VTDP, or continue the VTDP at the new rate.

If the customer elects to discontinue its VTDP prior to the end of the commitment period, the customer will be subject to termination charges. Termination charges shall equal one hundred percent (100%) of the unpaid charges for the first twelve (12) months of the term commitment, and fifty percent (50%) of the unpaid charges for the remaining period of the term, based on the monthly average number of lines in service from service inception to service termination.

(N)

(5) Renegotiation

Except as provided in 8.5.2(C)(3) preceding, the customer may choose to terminate an existing VTDP prior to the end of the term period and negotiate a new VTDP without termination liability provided the new VTDP meets the following requirements:

- the new VTDP must represent a term commitment greater than or equal to the previous VTDP,
- the new VTDP must represent a volume commitment greater than or equal to the previous VTDP, and
- the new VTDP must be based upon the rates that are currently in effect and available to all customers.

When the customer converts to a VTDP with a greater term commitment, the new VTDP will begin in month one and no credit will be given for the actual time in service for the original VTDP. Lines in service at the time of conversion to the new agreement will apply to the commitment level selected in the new agreement.

Customers upgrading to a new VTDP will be subject to a nonrecurring renegotiation charge as set forth in 8.5.4 following.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service8.6.1 Basic Service

Asynchronous Transfer Mode (ATM) service is a connection-oriented fast packet network service that permits the transmission of high speed data, voice and video traffic utilizing cell switching technology. ATM cells are fixed length cells that provide symmetrical or asymmetrical duplex transmissions. Utilizing statistical multiplexing, ATM service enables customers to allocate circuit bandwidth to applications as needed on virtual paths or channels. ATM service allows multiple communications applications to be transmitted within multiple paths or channels utilizing common fiber optic or copper facilities. ATM service allows for the interconnection of customer premises equipment that is ATM compatible.

Physical access to the ATM network is provided via an electrical cross-connect or an ATM access termination connecting the customer premises to the ATM User to Network Interface (UNI) or Network to Network Interface (NNI) port connection. Electrical cross-connects, provided in Section 17 following, are available at speeds of 1.544 Mbps (DS1) or 44.736 Mbps (DS3). ATM access terminations are available at speeds of 1.544 Mbps (DS1), 3.088 Mbps (2xDS1), 6.176 Mbps (4xDS1), 9.264 Mbps (6xDS1), 44.736 Mbps (DS3), 155.52 Mbps (OC3), or 622.08 Mbps (OC12) and are provided in Section 8.6.2 following. When an electrical cross-connect is used in the provision of ATM service, the expanded interconnection regulations, rates and charges set forth in Section 17 will apply in addition to the ATM rates and charges set forth in Section 8.6.6 following.

(C)

8.6.2 Service Components(A) ATM Access Termination

The ATM access termination rate element provides a communications path between the customer's ATM termination equipment and the serving wire center of that equipment. ATM access terminations are available at 1.544 Mbps (DS1), 3.088 Mbps (2xDS1), 6.176 Mbps (4xDS1), 9.264 Mbps (6xDS1), 44.736 Mbps (DS3), 155.52 Mbps (OC3), or 622.08 Mbps (OC12) levels. DS3,

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service8.6.2 Service Components (Cont'd)(A) ATM Access Termination (Cont'd)

OC3 and OC12 ATM access terminations are based on distance. In addition, OC3 and OC12 access terminations will be provided with or without Telephone Company provided terminal equipment at the customer's premises. The mileage used to determine the monthly rate for access terminations located outside a Telephone Company wire center is the airline distance between the customer's designated premises and the Telephone Company serving wire center of that premises. The mileage measurement is determined by utilizing exchange maps and mileage tables located in designated Telephone Company offices for such purposes. When a customer elects to furnish its own terminal equipment at the customer's premises, the customer will work cooperatively with the Telephone Company to provide a compatible physical interface, and will identify approved equipment types for use in conjunction with Telephone Company provided equipment. The customer is responsible for providing all facilities and cabling necessary to connect customer provided equipment to the interface.

(C)
(C)
(M)(B) ATM Interoffice Mileage

The ATM interoffice mileage rate element provides for the end office equipment and the transmission channel between the serving wire center of the customer's designated premises and the serving wire center of the ATM switch. ATM interoffice mileage rates are made up of the interoffice mileage facility rate and the interoffice mileage termination rate. ATM interoffice mileage rates are set forth in Section 8.6.6 following and are available at speeds of 1.544 Mbps (DS1), 3.088 Mbps (2xDS1), 6.176 Mbps (4xDS1), 9.264 Mbps (6xDS1), 44.736 Mbps (DS3), 155.52 Mbps (OC3), and 622.08 Mbps (OC12).

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service8.6.2 Service Components (Cont'd)(B) ATM Interoffice Mileage (Cont'd)(1) ATM Interoffice Mileage Facility

The ATM interoffice mileage facility rate recovers the cost of the transmission path which extends between the serving wire center of the customer's designated premises and the Telephone Company serving wire center of the ATM switch, and includes primarily outside plant used to provide the facility.

(2) ATM Interoffice Mileage Termination

The ATM interoffice mileage termination rate recovers the cost of the end office equipment associated with terminating the facility (i.e., basic circuit equipment and termination at the serving wire center and/or ATM switch). The Telephone Company applies a 50% billing percentage to the mileage termination fixed rate on jointly owned circuits, and applies 100% on wholly owned circuits. When the ATM interoffice mileage facility is zero (i.e., collocated service wire centers), neither the interoffice mileage facility nor the interoffice mileage termination rate will apply.

(C) User to Network Interface (UNI) Port Connection

The UNI port connection is a standard interface used to connect the end user to the Telephone Company's ATM network. It receives the data cell from the customer's network or CPE devices and verifies that the customer address destination is valid before transferring the cell.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service8.6.2 Service Components (Cont'd)(C) User to Network Interface (UNI) Port Connection (Cont'd)

The UNI port connection is available at speeds of 1.544 Mbps, 3.088 Mbps (2xDS1), 6.176 Mbps (4xDS1), 9.264 Mbps (6xDS1), 44.736 Mbps, 155.52 Mbps, and 622.08 Mbps. The UNI port connection must be provided at the same transmission speed as the electrical cross-connect or ATM access termination. One electrical cross-connect, special access channel termination or ATM access termination is required per UNI port connection. (C)

(D) Network to Network Interface (NNI) Port Connection

The NNI port connection provides bi-directional polling between the Telephone Company's ATM switch and the interexchange carrier's or other customer's ATM network.

The NNI port connection is available at speeds of 1.544 Mbps, 3.088 Mbps (2xDS1), 6.176 Mbps (4xDS1), 9.264 Mbps (6xDS1), 44.736 Mbps, 155.52 Mbps, and 622.08 Mbps. The NNI port connection must be provided at the same transmission speed as the electrical cross-connect or ATM access termination. One electrical cross-connect, special access channel termination or ATM access termination is required per NNI port connection. (C)

(E) Permanent Virtual Circuits (PVCs)

The PVC provides a software defined electronic path between two port connections within the ATM network. An intraexchange PVC defines a path across the Telephone Company's ATM network and the customer's premises. An interexchange PVC defines a path between two Telephone Company ATM networks. Meetpoint billing arrangements do not apply to interexchange PVCs. A UNI or NNI port connection may be associated with any number of PVCs. Since all PVCs need not be in use at the same time, it is possible for

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service (Cont'd)8.6.2 Service Components(E) Permanent Virtual Circuits (PVCs) (Cont'd)

the total bandwidth of all PVCs associated with one Port Connection to exceed the bandwidth of the Port Connection. It is not possible, however, for the simultaneous aggregate of the PVC's throughput to exceed the bandwidth of the Port Connection. Such a relationship is referred to as oversubscription and, when this occurs, there can be no guarantee that the bandwidth defined for that PVC will be available at any point in time. The maximum port oversubscription allowed is by a subscription factor of 500%. Multiple PVCs can be defined over a single ATM UNI or NNI Port Connection, thereby providing a single access line with the capability to transmit data, voice, and video to multiple destinations simultaneously. A PVC can be set up as either a Virtual Path (VP) or a Virtual Channel (VC) type connection. A VP may contain multiple VCs, referred to as tunneling. Tunneling allows customers to establish VCs or end to end connections between the customer CPE via VPs.

Customers may select from the following three Quality of Service (QoS) categories for PVCs to ensure greater reliability for mission critical application in the event of network congestion:

Lowest Priority – Unspecified Bit Rate (UBR)

Medium Priority – Variable Bit Rate-non-real time (VBR-nrt)

Highest Priority – Constant Bit Rate (CBR)

This flexibility helps to ensure maximum performance and satisfaction for individual customer communications applications.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service (Cont'd)8.6.2 Service Components (Cont'd)(F) Information Rate (IR)

Information Rate (IR) defines the amount of data throughput on a designated PVC that the Telephone Company will support under normal operating conditions. IRs are traffic management parameters that allow the customer to fine tune implementation of ATM Service. The IRs of PVCs can be customer specified and can be ordered in increments of bandwidth. IRs can be used on CBR and VBR PVCs only. IRs for UBR are, by definition, not used, and IRs can be up to the line rate of the UNI port transfer rate. UBR uses available network bandwidth and is a "best effort" service, therefore, there are no guarantees with the delivery of UBR traffic. IRs are assigned to each PVC symmetrically (two-way). Any data burst beyond the IR may be labeled Discard Eligible (DE) if the data transfer rate exceeds the IR of the PVC being used. If the ATM network develops congestion, the cells marked DE may be discarded.

8.6.3 Service Provisioning

- (A) ATM service is offered where facilities exist. If it is necessary to construct facilities to satisfy service requests, the service may be provided pursuant to the Telephone Company's special construction provisions set forth in Section 14 following.
- (B) ATM service requires the use of industry standard CPE that functions as a multiplexer, aggregator, concentrator, or router. The Telephone Company will advise the customer of the type of CPE that the customer will need to purchase to support ATM service. The CPE functions to accumulate customer data and transfer it into an ATM format suitable for transmission over the ATM Network.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service (Cont'd)8.6.3 Service Provisioning (Cont'd)

- (C) In the operation of ATM, the CPE captures arriving data into fixed-length ATM 53-byte cells. These cells contain a 48-byte cell user information segment, and a five-byte header containing a Virtual Path Identifier (VPI) and a Virtual Channel Identifier (VCI), identifying which PVC in the network should be used to forward the cell to the proper destination. The CPE sends the cells into the ATM network over an electrical cross-connect or ATM access termination. The ATM switch, located in the Telephone Company central office, reads the identifying header information and routes the cell to the proper destination over a VP and/or VC based on a preestablished PVC.
- (D) ATM service is capable of handling the requirements of bursty data sources because of the ability of the service to allocate additional bandwidth when not in use by other sources. ATM service can also transmit delay sensitive traffic, such as voice and video, on the same physical circuit, but with different QoS on separate PVCs within the same physical circuit.
- (E) The actual throughput or information rate (IR) for aggregated PVC bandwidths cannot exceed the port speed, or the port line transfer rate. The customer must specify, when ordering, the QoS for each PVC to be connected to the ATM network. The QoS category defines the performance parameters for each connection to meet specific networking requirements. The Telephone Company provides the following three QoS categories:

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service (Cont'd)8.6.3 Service Provisioning (Cont'd)

(E) (Cont'd)

- (1) Constant Bit Rate (CBR) - for delay or timing sensitive traffic such as voice or interactive video, and provides a constant data rate and consistent delay parameters throughout the ATM network. CBR PVCs are given the highest priority in the ATM network, and are provisioned to provide the minimum Cell Delay Variation (CDV) or "jitter". The Peak Cell Rate (PCR), which is the highest transmission rate the logical connection will allow, must be specified by the customer.
- (2) Variable Bit Rate (VBR-nrt) - a non-real time service designed for bursty data applications that provides a preassigned variable bit rate. VBR-nrt requires three traffic parameters: (1) Peak Cell Rate (PCR), which defines the maximum rate of transmission, (2) Sustainable Cell Rate (SCR), which provides an average throughput information rate expected on the connection, and (3) Maximum Burst Size, which is the maximum number of consecutive cells that may be transmitted to the Telephone Company ATM network in a single burst at a rate that exceeds the sustained cell rate (SCR), but does not exceed the peak cell rate (PCR), assigned to the variable bit rate (VBR) connection. The default MBS is 100 cells, unless the customer specifies another value of less than 100 cells. Customers must specify the PCR, SCR, and MBS for ATM service. Oversubscription is allowed with VBR. The maximum subscription rate for a VBR PVC is 400%. Transmission speeds cannot exceed 400% of the SCR for durations greater than the MBS without encountering discard eligible cells, nor can transmission speeds exceed the port speed.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)

8.6 Asynchronous Transfer Mode (ATM) Service (Cont'd)

8.6.3 Service Provisioning (Cont'd)

(E) (Cont'd)

- (3) Unspecified Bit Rate (UBR) - takes advantage of excess network bandwidth and is best suited for communication applications where timing of delivered data is not critical. PCR and SCR values are not used with UBR. An advantage of UBR is that ATM cells can be transmitted up to the port line rate, if available, rather than being limited to a predefined maximum PCR, as with VBR and CBR. However, throughput depends on the total data volumes being transmitted through the switch. UBR PVCs must be ordered at the same transmission speed as the port with which it is associated.

(N)
|
(N)

Since multiple PVCs may be defined on one physical port, it is possible for the cumulative data IRs of multiple PVCs to exceed the physical bandwidth of the port. This is referred to as oversubscription and, when this occurs, there will be no guarantee that the IR defined for the port and PVC will be available at any point in time.

For CBR PVCs, the customer may specify IRs in terms of PCR. The maximum PCR for a CBR PVC is limited to 99% of the port transfer rate. When CBR traffic is mixed with VBR and UBR on the same port, the sum of all the PCRs associated with the CBR PVCs must be subtracted from the port speed before calculating the subscription level for remaining VBR PVCs. The PCR should never exceed the PCR available at the lowest port access between the local and remote locations.

(E) (Cont'd)

For VBR PVCs, the user can burst above the SCR for short periods only. The limit for VBR transmission at the PCR is 100 cells. This limit is called the Maximum Burst Size (MBS). If the MBS is exceeded, a period of lower activity must follow to meet the SCR. IRs for UBR traffic are not specified and use only available network bandwidth and may burst up to the line rate.

8.6.4 Rate Regulations

The minimum service period for ATM service is one month.

The rates and charges for ATM service are set forth in Section 8.6.6 following, and are in addition to any applicable rates and charges set forth in any other sections of this tariff. There are two types of rates and charges that may apply to ATM service. These are monthly recurring rates and nonrecurring charges, both of which are billed in advance.

When a customer requests that a UNI or NNI port connection or ATM access termination be rearranged, a charge equal to one half the month-to-month UNI or NNI port connection or ATM access termination nonrecurring charge associated those services will apply. Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements as set forth in 5.2.6(E) preceding or a change in the physical location of the point of termination at the customer designated premises. Changes in the physical location of the point of termination are treated as disconnects and starts, and will be assessed the nonrecurring charge associated with the month-to-month rates for that service.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service (Cont'd)8.6.4 Rate Regulations (Cont'd)

When the customer orders additional PVCs with a designated IR, the PVC nonrecurring charges shall apply. When a change is made to a customer's ATM configuration at the customer's request, the administrative nonrecurring charge shall apply. Such changes are defined as those rearrangements necessary to add, delete, or rearrange the customer's configuration, including changes to IRs. Although multiple changes may be caused by such actions, only one administrative charge will apply. When the customer changes the IR on an existing PVC, the PVC nonrecurring charge will apply in addition to the administrative nonrecurring charge.

Special construction charges, as set forth in Section 14 following, may apply when technical limitations and/or the lack of facilities exist, or if it necessary to construct facilities to satisfy service requests.

The customer should specify the IR and class of service for each PVC ordered. The IR is the maximum information rate at which the customer's traffic will be admitted to the ATM network without being designated eligible for discard. No individual PVC IR shall exceed 99 percent of the UNI Port Connection transmission speed. The sum of all PVC VBR IRs on a single ATM port must not exceed 500 percent of the port line speed remaining after removal of the sum of the CBR PVC speeds.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service (Cont'd)8.6.5 ATM Term Agreement Plans(A) General

Asynchronous Transfer Mode Term Agreement Plans (ATMTAP) are available for UNI and NNI port connections, ATM access terminations, and ATM interoffice mileage. An ATMTAP provides the customer with discounted rates for the services listed. The customer agrees to a minimum service commitment on a per service basis.

(B) Ordering Provisions

The customer must order an ATMTAP in writing to the Telephone Company. An ATMTAP may be ordered based on the following plan options:

3 Years

5 Years

Once the plan is established, standard access ordering procedures will be followed.

When a customer converts to an ATMTAP, no access order charges are applied toward facilities in service at that time. If a customer moves from a month-to-month plan to an ATMTAP, or upgrades from one ATMTAP to another, no access order charges are applied.

ISSUE DATE:
November 15, 2000

November 16, 2000

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service (Cont'd)8.6.5 ATM Term Agreement Plans (Cont'd)(C) Service Rearrangements

When a UNI or NNI port connection or ATM access termination committed to an ATMTAP is rearranged as set forth in 8.6.4 preceding, a charge equal to one half the month-to-month UNI or NNI port connection or ATM access termination nonrecurring charge associated those services will apply.

(D) Termination Liabilities

If a customer disconnects any portion of their ATMTAP service prior to the expiration of the commitment period, the customer will be billed 50% of the monthly ATMTAP charges for the remaining portion of the committed term. For example, a customer disconnecting in the 12th month of a 3 year plan will be charged 50% of the remaining 24 months of billing.

(E) Rate Changes

In this section, the term "rate" refers to the charges associated with the entire circuit covered by an ATMTAP. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the ATMTAP. If a Telephone Company initiated rate increase causes a customer's rates to increase by 10% or more at any one time, the customer may cancel the ATMTAP without incurring termination liability charges.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.6 Asynchronous Transfer Mode (ATM) Service (Cont'd)8.6.5 ATM Term Agreement Plans (Cont'd)(F) Extension of a ATMTAP Commitment Period

ATMTAP commitment periods can be extended by the customer at any time during the term of the plan, up to a maximum of 5 years. The number of months accrued in the current plan will apply toward the new plan selected. For example, a customer having completed 15 months of a 3 year commitment can extend the commitment to 5 years and no additional charges will be assessed. The first payment will be considered the 16th payment under the new 5 year plan.

(G) Renewal of a ATMTAP

At the end of the ATMTAP service commitment period, the customer may subscribe to a new ATMTAP at the prevailing rates set forth in Section 8.6.6 following. If the customer does not specify renewal terms in writing 90 days prior to the expiration of the three or five year service period, the commitment period and ATMTAP rates and regulations in effect at the time of expiration will automatically renew.

(H) Cancellation Charges

When a customer cancels an order for ATM services being provided under an ATMTAP, cancellation charges, as set forth in 5.2.4 preceding, will be calculated using the nonrecurring charges associated with the service originally ordered by the customer. The customer may terminate an ATMTAP at the end of the minimum commitment period with no penalty or obligation to continue service.

8.7 Sprint Custom Access Solutionssm

8.7.1 General

Sprint Custom Access Solutionssm is designed for the utilization of multiple voice and frame relay combinations over a single 1.544 Mbps facility. Sprint Custom Access Solutionssm includes frame relay channels and the use of a digital access and cross connect system (DACS) located in a Telephone Company wire center. The channels designated for frame relay will be routed to a frame relay switch through the DACS to a customer designated location. Sprint Customer Access Solutionssm is limited to the frame relay and DACS capability, and voice channels must be obtained separately. The frame relay bandwidth selected by the customer will determine the UNI port connection and PVC committed information rate provided. One PVC, with throughput equal to 50% of the UNI port connection, is provided with each Sprint Custom Access Solutionssm arrangement. For example, when the customer selects a Sprint Custom Access Solutionssm arrangement for 10 voice channels and 512 Kbps frame relay service, a PVC with a CIR of 256 Kbps will be provided. Additional PVCs requested by the customer will be subject to the rates and regulations set forth in Section 8.3 preceding.

Sprint Custom Access Solutionssm is designed to accommodate the voice and frame relay channel combinations identified below. The frame relay portion of Sprint Custom Access Solutionssm is designed as part of a voice/frame relay combination, with concurrent voice and frame relay availability. The customer is responsible for providing the voice capability.

Voice Channels	Frame Relay Service			
	256 Kbps (4 Channels)	384 Kbps (6 Channels)	512 Kbps (8 Channels)	768 Kbps (12 Channels)
6	10	12	14	18
8	12	14	16	20
10	14	16	18	22
12	16	18	20	24
14	18	20	22	N/A
16	20	22	24	N/A
18	22	24	N/A	N/A
20	24	N/A	N/A	N/A

Shaded area reflects total channels utilized for each combination.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)

8.7 Sprint Custom Access SolutionsSM (Cont'd)

8.7.1 General (Cont'd)

Sprint Custom Access SolutionsSM will be provided over a 1.544 Mbps facility for connection to the Telephone Company's wire center equipment and frame relay network via a digital access and cross connect system. The provision of Sprint Custom Access SolutionsSM requires terminating equipment (e.g., channel service unit) at the customer's designated premises to allow for the appropriate voice and frame relay channels. The customer is responsible for providing and maintaining the terminating equipment at the customer's designated premises. Sprint Custom Access SolutionsSM includes the full bandwidth of a 1.544 Mbps facility, and cannot be provisioned over fractional DS1 channels as set forth in 7.2.8(A)(2).

Sprint Custom Access SolutionsSM is available only in suitably equipped end offices where frame relay facilities exist. Information pertaining to end offices equipped to provide frame relay services is set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

(N)

8.7 Sprint Custom Access Solutionssm (Cont'd)8.7.2 Rate Regulations

- (A) The service period for Sprint Custom Access Solutionssm is one, two, or three years. All Sprint Custom Access Solutionssm arrangements will begin in month one. If the customer requests that service be disconnected prior to the expiration of the service period selected, a 50% penalty will be assessed for the remaining months of the term. For example, a customer disconnecting in the 12th month of a 3 year plan will be charged 50% of the remaining 24 months of billing.
- (B) Customers may upgrade a Sprint Custom Access Solutionssm arrangement without incurring termination liability penalties under the following circumstances:
- (1) The order for the disconnect of the existing Sprint Custom Access Solutionssm and the order for the upgraded service arrangement must be received at the same time, with no lapse in service between the installation of the new service and the disconnect of the existing service.
 - (2) The upgraded service is provided between the same customer and central office locations as the discontinued Sprint Custom Access Solutionssm service.
 - (3) The service period of the upgraded service is equal to or greater than the service period of the existing Sprint Custom Access Solutionssm.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.7 Sprint Custom Access Solutionssm (Cont'd)8.7.2 Rate Regulations (Cont'd)

(B) (Cont'd)

For example, a Sprint Custom Access Solutionssm arrangement equipped with 6 voice channels and 256 Kbps frame relay service may be upgraded to a higher bandwidth or longer term Sprint Custom Access Solutionssm arrangement, or a Sprint Custom Access Solutionssm arrangement may be upgraded to a next generation offering such as OptiPoint, Sprint SONET Ring Servicesm, or Asynchronous Transfer Mode (ATM) service.

Additionally, customers may disconnect Sprint Custom Access Solutionssm, without penalty, should the total of the monthly recurring rates associated with the Sprint Custom Access Solutionssm increase by 10% or more at any one time. Rate decreases will automatically be applied to the monthly recurring rates for the remainder of the service period. If the customer does not specify renewal terms in writing 90 days prior to the expiration of the service period, the existing Sprint Custom Access Solutionssm rates in effect at the time of expiration will automatically continue. The customer can terminate Sprint Custom Access Solutionssm at the end of the service period with no penalty or obligation to continue the service.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.7 Sprint Custom Access Solutionssm (Cont'd)8.7.2 Rate Regulations (Cont'd)(C) Service Rearrangements (T)

When a Sprint Custom Access Solutionssm is rearranged, a charge equal to one half the nonrecurring installation charge for that Sprint Custom Access Solutionssm arrangement will apply. Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements as set forth in 5.2.6(E) preceding or a change in the physical location of the point of termination at the customer designated premises. Changes in the physical location of the point of termination are treated as disconnects and starts, and will be assessed the full nonrecurring charge associated with the Sprint Custom Access Solutionssm arrangement selected.

(D) Cancellation Charges (T)

When a customer cancels an order for Sprint Custom Access Solutionssm, cancellation charges, as set forth in 5.2.4 preceding, will be calculated using the nonrecurring charges associated with the Sprint Custom Access Solutionssm arrangement being cancelled.

(E) Special Construction charges, as set forth in Section 14 following, may apply where facilities and/or operating conditions do not permit the provision of Sprint Custom Access Solutionssm and the customer desires the Telephone Company to provision the Sprint Custom Access Solutionssm. (T)

ACCESS SERVICE

8. Specialized Network Services (Cont'd)

(S)(x)

8.8 Concentrated Area High Speed Data Service8.8.1 General Description

- (A) Concentrated Area High Speed Data Service (CA-HSDS) provides digital subscriber line (DSL) technology to customers (i) who represent all residential end users within a master planned community that has been approved, with or without conditions, by all applicable governmental agencies for the construction of a minimum of 3,000 residential units on 3,000 contiguous acres of land, (ii) who have committed 100% of such residential end user locations to service within a single CA-HSDS service area for a minimum service period of ten (10) years and (iii) who have made such commitment prior to the completion of any residential unit within the community such that the network design for the community can support 100% utilization of the outside plant facilities.
- (B) CA-HSDS is provided with DSL technology at a basic speed of up to 512 Kbps down/up to 128 Kbps up. The "up" speed represents the transmission speed in kilobits per second (Kbps), from the point of demarcation at the customer's designated premises to the Telephone Company's DSL connection point; while the "down" speed represents the transmission speed in Kbps or megabits per second (Mbps), from the Telephone Company's DSL connection point to the point of demarcation at the customer's designated premises. Actual speeds may be affected by loop distance and other transmission factors.
- (C) Individual end users within the concentrated area may select enhanced service options providing (1) up to 1.5 Mbps down/up to 384 Kbps up or (2) up to 640 Kbps down/up to 640 Kbps up. The rates and charges associated with the enhanced service options are assessed to the end user, and are in addition to the basic rate billed to the concentrated area customer.

(S)(x)

- (x) Under authority of Section 61.58(d)(3) of the Federal Communications Commission's Rules, the effective date of these revisions is deferred from September 1, 2001 to September 16, 2001.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)

(S)(x)

8.8 Concentrated Area High Speed Data Service (Cont'd)8.8.2 Service Provisioning

- (A) The Telephone Company will provide CA-HSDS only where new capable Fiber-to-the-Curb network facilities are being deployed to support connection to the local telephone network.
- (B) CA-HSDS provides a virtual private line connection from the customer's designated premises to the point of connection on the Telephone Company's network.
- (C) The Telephone Company does not undertake to originate data, but offers the use of CA-HSDS to customers for the purpose of transporting data originated by end users in the concentrated area.
- (D) The Telephone Company will not provision CA-HSDS if it has reasonably determined that: a) it is not technically feasible over existing facilities; or b) it will cause interference problems within the Telephone Company's network or other facilities.
- (E) All end users within a concentrated area will be served from the nearest end office suitably equipped with DSL technology. Information pertaining to end offices equipped to provide DSL technology is set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. CA-HSDS will be provided subject to the availability and limitations of the Telephone Company wire centers and outside plant facilities. CA-HSDS is only available where technical capabilities permit such facility distance and type of physical plant.
- (F) The Telephone Company will install DSL technology at end user locations in the concentrated area equipped with pre-wiring which meets Telephone Company specifications. Additional labor performed by the Telephone Company to satisfy custom installation requirements at an end user location will be billed to the end user on a time and material basis in accordance with the provisions set forth in Section 13 following.

(S)(x)

- (x) Under authority of Section 61.58(d)(3) of the Federal Communications Commission's Rules, the effective date of these revisions is deferred from September 1, 2001 to September 16, 2001.

August 29, 2001

Issued Under Transmittal No. 165
Vice President-Regulatory Affairs
6360 Sprint Parkway
Overland Park, Kansas 66251

EFFECTIVE DATE:
September 1, 2001

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.8 Concentrated Area High Speed Data Service (Cont'd)8.8.2 Service Provisioning (Cont'd)

(G) The Telephone Company will provision and maintain the DSL technology for end users in a concentrated area up to and including the splitter and Network Interface Device. The Telephone Company will advise the concentrated area customer and its end users of the customer premises equipment necessary to support DSL technology which the end user will need to purchase.

(H) The DSL technology employed with CA-HSDS may require a splitter at both the customer's designated premises and the Telephone Company's serving wire center to split the traffic between data and voice. The concentrated area end user is responsible for providing and maintaining the splitter at the customer's designated premises. The voice traffic will be routed to the serving wire center switching equipment while the data traffic will be directed through a multiplexer for connection to the Telephone Company's network.

(I) During the Telephone Company's network maintenance and software update period, it may be necessary to temporarily place the DSL central office equipment utilized with CA-HSDS out of service. The Telephone Company also reserves the right to temporarily interrupt CA-HSDS at other times in emergency situations.

8.8.3 Responsibility of the Customer

(A) The end users in a concentrated area are responsible for providing compatible customer premises equipment for use in connection with CA-HSDS DSL technology.

(x) Under authority of Section 61.58(d)(3) of the Federal Communications Commission's Rules, the effective date of these revisions is deferred from September 1, 2001 to September 16, 2001.

(S)(x)

(S)(x)

ACCESS SERVICE

8. Specialized Network Services (Cont'd)

(S)(x)

8.8 Concentrated Area High Speed Data Service (Cont'd)

8.8.3 Responsibility of the Customer (Cont'd)

- (B) The concentrated area end user is responsible for providing the Telephone Company with the necessary information (e.g., data link connection identifier(s), and/or internet protocol) to provision the CA-HSDS DSL technology.
- (C) The concentrated area customer must provide the Telephone Company with a letter of agency for each end user location being provided basic CA-HSDS.

8.8.4 Service Components

(A) Basic Service

The CA-HSDS customer will provide DSL service at a basic speed of up to 512 Kbps down/up to 128 Kbps up for 100 percent of the end user locations within the specified geographic area. The rates for basic service are applied per end user location equipped and will be billed on a monthly basis to the concentrated area customer.

(B) Enhanced Service Options

Two enhanced CA-HSDS options are available based on the "downstream" and "upstream" speed combinations chosen by the end user:

<u>Downstream Speed</u>	<u>Upstream Speed</u>
up to 1.5 Mbps	up to 384 Kbps
up to 640 Kbps	up to 640 Kbps

The rates for the enhanced service options are applied per end user location equipped and will be billed on a monthly basis to the end user in the concentrated area ordering the option. The enhanced service rates billed to individual end users are in addition to the basic service rates billed to the concentrated area customer.

(S)(x)

(x) Under authority of Section 61.58(d)(3) of the Federal Communications Commission's Rules, the effective date of these revisions is deferred from September 1, 2001 to September 16, 2001.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.8 Concentrated Area High Speed Data Service (Cont'd)8.8.5 Renewal of a CA-HSDS Arrangement

The concentrated area customer must specify its intent to renew a CA-HSDS arrangement in writing at least 90 days prior to the expiration of the ten year CA-HSDS commitment period. If the concentrated area customer does not subscribe to a new CA-HSDS arrangement, end users in the concentrated area will have the option of converting to the prevailing month-to-month rates for DSL technology set forth in Section 8.5.3 preceding, or discontinuing service, as of the expiration date of the concentrated area customer's CA-HSDS arrangement. The concentrated area customer is responsible for providing written notification to end users locations in the concentrated area regarding the discontinuance of its CA-HSDS arrangement. (Z)

8.8.6 Service Areas

CA-HSDS is available in the following Telephone Company wire centers where DSL capability exists:

ACCESS SERVICE

8. Specialized Network Services (Cont'd)8.9 Single-Pair High-Speed Digital Subscriber Line Service8.9.1 General Description

(T)

(A) SHDSL Service Description

Single-Pair High-Speed Digital Subscriber Line (SHDSL) service offers customers the ability to transmit data "upstream" and receive data "downstream" symmetrically, or at the same speed. The "up" speed represents transmission speeds in kilobits (kbps) or megabits (Mbps) per second from the point of demarcation at the customer designated premises to the Telephone Company's SHDSL connection point; while the "down" speed represents transmission speeds in kbps or Mbps from the Telephone Company's SHDSL connection point to the point of demarcation at the customer's designated premises. SHDSL service is offered at speed levels of 768 kbps, 1.5 Mbps or 2.0 Mbps. Actual speeds may be affected by loop distance, modem service, Internet congestion, and other external factors.

(B) SHDSL Provisioning

SHDSL service provides a virtual private line connection from the customer's designated premises to the point of connection on the Telephone Company's network using industry standard G.991.2 technology. Access from the Telephone Company's SHDSL connection point will be provided where facilities and equipment exist.

The Telephone Company will qualify the local exchange service loop between the customer's designated premises and the serving wire center. The purpose of qualification is to determine the availability and suitability of existing Telephone Company facilities to provide the service, and to determine if loop conditioning is required to support SHDSL. The Telephone Company will not provision this service on facilities which are not suitable for SHDSL.

8. Specialized Network Services (Cont'd)

(N)

8.9 Single-Pair High-Speed Digital Subscriber Line Service (Cont'd)8.9.1 General Description (Cont'd)(B) SHDSL Provisioning (Cont'd)

The Telephone Company does not undertake to originate data, but offers the use of its SHDSL service, where available, to customers for the purpose of transporting data originated by the customer or a third party.

All customers will be served from the nearest suitably equipped end office. Information pertaining to end offices equipped to provide SHDSL service is set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. SHDSL will be provided subject to the availability and limitations of the Telephone Company wire centers and outside plant facilities. SHDSL service is only available where technical capabilities permit such facility distance and type of physical plant.

(C) Responsibility of the Telephone Company

The Telephone Company will provision and maintain SHDSL service for the customer up to and including the Network Interface Device. The Telephone Company will advise the customer of the customer premises equipment necessary to support SHDSL service that the customer will need to purchase, install, and configure.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)

(N)

8.9 Single-Pair High-Speed Digital Subscriber Line Service (Cont'd)

8.9.1 General Description (Cont'd)

(D) Rights of the Telephone Company

The Telephone Company will not provision SHDSL if it has reasonably determined that:

- (1) it is not technically feasible over existing facilities;
- (2) it will cause interference problems within the Telephone Company's network or other facilities; or
- (3) the customer's network or customer premise equipment is not compatible with the Telephone Company's SHDSL network.

During the Telephone Company's network maintenance and software update period, it may be necessary to temporarily place the SHDSL central office equipment out of service. The Telephone Company also reserves the right to temporarily interrupt the SHDSL service at other times in emergency situations.

(E) Responsibility of the Customer

The customer is responsible for providing compatible customer premises equipment that is used for connection to SHDSL service.

The customer is responsible for providing the Telephone Company with the necessary information (e.g., data link connection identifier(s), and/or internet protocol) to provision the SHDSL service.

The customer ordering SHDSL service on behalf of its subscriber(s) must obtain a letter of agency.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)

(N)

8.9 Single-Pair High-Speed Digital Subscriber Line Service (Cont'd)

8.9.2 Rate Regulations

(A) Rate Elements

(1) SHDSL service is available at the following data speeds:

Downstream/Upstream Speed

Option 1	768/768 kbps
Option 2	1.5/1.5 Mbps
Option 3	2.0/2.0 Mbps

(2) SHDSL is provided for a period of one, two, three, four or five years. A nonrecurring charge and a monthly recurring rate will apply per SHDSL arrangement as set forth in 8.9.3 following.

(3) Line conditioning is available at no charge and may be required if the facility will not accommodate SHDSL service. This may include, but is not limited to, the removal of load coils, bridge taps and/or repeaters. The Telephone Company does not warrant that line conditioning will permit the provision of SHDSL service.

(N)

8.9 Single-Pair High-Speed Digital Subscriber Line Service (Cont'd)

8.9.2 Rate Regulations (Cont'd)

(B) Rate Application

SHDSL service provides the customer with rate stabilization and discounted rates based upon the service commitment period selected by the customer. Service commitment periods of one, two, three, four and five years are available. The rates and charges for SHDSL service are set forth in 8.9.3 following.

Rate decreases will automatically be applied to the monthly recurring rates for the remainder of the service period. Additionally, customers may discontinue SHDSL service, without penalty, should the monthly recurring rates increase by 10% or more at any one time.

A nonrecurring charge, as set forth in 8.9.3 following, will apply for each SHDSL service activated.

ACCESS SERVICE

8. Specialized Network Services (Cont'd)

(N)

8.9 Single-Pair High-Speed Digital Subscriber Line Service (Cont'd)8.9.2 Rate Regulations (Cont'd)(C) Renegotiation

The customer may choose to terminate an existing SHDSL service prior to the end of the committed period and negotiate a new SHDSL service, without termination liability, provided the new SHDSL service meets the following requirements:

- the new SHDSL service must represent a service commitment greater than or equal to the previous SHDSL service, and
- the SHDSL speed option selected for the new SHDSL service must be greater than or equal to the speed option of the previous SHDSL service, and
- the new SHDSL service must be based upon the rates that are currently in effect and available to all customers.

When the customer converts to a greater service commitment, actual time in service for the original SHDSL service will be applied to the new SHDSL service. However, no credits or refunds will apply for the billing of actual time in service for the previous SHDSL service.

(D) Downgrade

The customer may choose to downgrade an existing SHDSL service to a lower bandwidth option, provided the same customer premises location is maintained. A nonrecurring downgrade charge, as set forth in 8.9.3 following, will apply per service downgraded.

When a customer downgrades to a lower SHDSL option, actual time in service for the original SHDSL service will be applied to the lower speed option. However, no credits or refunds will apply for the billing of actual time in service for the previous SHDSL service.

8.9 Single-Pair High-Speed Digital Subscriber Line Service (Cont'd)

8.9.2 Rate Regulations (Cont'd)

(E) Renewal

At expiration of the SHDSL service, the customer may choose a new SHDSL service, continue with the rates, charges and terms and conditions in effect at the end of the expiring SHDSL service on a year-to-year basis, or discontinue service. A conversion to a new SHDSL service, or discontinuance, will require that the customer submit a service change order.

(F) Special Construction Charges

Any special construction charges incurred for services billed under a SHDSL service will apply as specified in Section 14 following.

(G) Termination Liabilities

If a customer disconnects any portion of their SHDSL service prior to the end of their committed term, a termination liability charge as set forth in 8.9.3 following will apply for each SHDSL arrangement disconnected.
